Russia Goes Dry Alcohol State And Society:

Russia Goes Dry Stephen White, 1996 Russians are the world's heaviest drinkers The consumption of alcohol permeates family life shapes the economy and plays an occasional but striking role in the political leadership It was in Russia in the 1980s that the most sustained attempt of its kind was made to eliminate alcohol abuse and even drinking itself Drawing upon a wide range of original sources including interviews surveys and the local press Stephen White provides the first full length study of this extraordinary campaign He traces the profound influence of alcohol through Russian history and charts the campaign from its initiation under Mikhail Gorbachev to its disappointing aftermath in the post communist 1990s Attractively written and fully illustrated *Russia Goes Dry* first published in 1995 is an entertaining as well as instructive guide to a changing society and a classic case study of the limitations of politically directed social reform

Global Temperance and the Balkans Nikolay Kamenov, 2020-06-24 This book examines the local manifestation of the global temperance movement in the Balkans It argues that regional histories of social movements in the modern period could not be sufficiently understood in isolation Moreover the book argues that broad transformations of social movements for example the power centers associated with moral religious temperance and the later scientifically based anti alcohol campaigns are more easily identifiable through a detailed regional study For this purpose the book begins by sketching the historical development as well as the main historiographical themes surrounding the worldwide temperance movement The book then zooms in on the movement in the Balkans and Bulgaria in particular American missionaries founded the temperance movement in the closing decades of the nineteenth century The interwar period however witnessed the proliferation of new professional organizations The book discusses the various branches as well as their international and political affiliations showing that the anti alcohol reform movement was one of the most important social movements in the region

challenges fieldwork yields important insights outside the reach of textual analysis

The Ethics of Public Health

Paternalism T M Wilkinson, 2024-12-30 This is an open access title available under the terms of a CC BY NC ND 4.0

International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations The Ethics of Public Health Paternalism is about policies that try to stop people damaging their own health From the point of view of public health advocates if people did not smoke or drank less alcohol or kept off junk food and sugary liquids they would tend to be healthier Hence such tactics as taxing tobacco restricting the sale of alcohol and limiting the density of fast food outlets Because these tactics appear to limit freedom of choice they are often pejoratively described as the actions of a nanny state that overvalues health and wrongly infringes on the autonomy of adults But many of us want to be healthy rather than ill and alive rather than dead Does a state really nanny us when it uses its power to make us healthier If it does should it stop Some public health policies might reduce inequities of health or save costs in medical treatment or correct market failures But as this book shows lots would not The best case for many public health interventions is paternalistic aiming to steer people away from making unhealthy choices against their own interests But even though it is the best case it often fails It overvalues health and undervalues autonomy It exaggerates the influence of addiction and the marketing of unhealthy products Except for smoking we do not have the evidence needed to show that unhealthy choices are so mistaken as to justify the interventions Much of what modern public health does when it tries to stop adults damaging their health has not been justified The Ethics of Public Health Paternalism applies political and moral philosophy to the ideas of both supporters and critics of public health interventions It uses philosophical analysis of the values of health and well being to explain what sort of evidence is needed to support public health interventions thus exposing a major gap in the arguments of public health advocates and it engages in detail with empirical evidence for instance about smokers regrets

The Demise of the Soviet Communist Party Atsushi Ogushi, 2007-11-02 This book based on extensive original research in previously unexplored sources including the party archives provides a great deal of new information on the disintegration of the Soviet communist party in 1991 and the preceding years It argues that contrary to prevailing views the party was reformable in late Soviet times but that attempts to reform it failed reforms succeeded in preventing the party interfering in the state body and thereby abolished the party's traditional administrative functions but without creating an alternative power centre and without transforming the party from a vanguard party into a parliamentary party It demonstrates that the party having ceased to offer career paths for aspiring party members thereby lost its reason for existence that an exodus of party members then followed which in turn caused a financial crisis and that this financial crisis and the resulting engagement in commercial activity fragmented and dispersed party property It shows how the failed coup of 1991 was led by the military rather than the party and how having lost its reason for existence and its property the party had no choice but to accept the reality that it was de facto dead

Comparative Quantification of Health Risks: Sexual

and reproductive health Majid Ezzati,2004 Over the centuries human health has improved because science has come to understand the main causes of disease affecting populations At the same time the broader policy relevant issue of population exposure to risks has remained under explored relative to documentation of established diseases This publication provides a comprehensive assessment of the scientific evidence on prevalence and the resulting health effects of a range of exposures that are known to be hazardous to human health

Comrades No More Renee De Nevers,2003-06-20 In 1989 Soviet control over Eastern Europe ended when the communist regimes of the Warsaw Pact collapsed These momentous and largely bloodless events set the stage for the end of the Cold War and ushered in a new era in international politics Why did communism collapse relatively peacefully in Eastern Europe Why did these changes occur in 1989 after more than four decades of communist rule Why did this upheaval happen almost simultaneously in most of the Warsaw Pact In *Comrades No More* Renee de Nevers examines how internal and external factors interacted in the collapse of East European communism She argues that Gorbachev s reforms in the Soviet Union were necessary to start the process of political change in Eastern Europe but domestic factors in each communist state determined when and how each country abandoned communism A demonstration effect emerged as Hungary and Poland introduced reforms and showed that Moscow would not intervene to prevent political and economic changes De Nevers analyzes the process of change in Hungary Poland Bulgaria the German Democratic Republic Czechoslovakia and Romania She traces the pattern of reform in each country and shows how these patterns influenced their postcommunist political evolution

Shooting Up Łukasz Kamiński,2017 From hallucinogenic mushrooms and LSD to coca and cocaine from Homeric warriors and the Assassins to the first Gulf War and today s global insurgents drugs have sustained warriors in the field and have been used as weapons of warfare either as non lethal psychochemical weapons or as a means of subversion Lukasz Kamienski explores why and how drugs have been issued to soldiers to increase their battlefield performance boost their courage and alleviate stress and fear as well as for medical purposes He also delves into the history of psychoactive substances that combatants self prescribe a practice which dates as far back as the Vikings *Shooting Up* is a comprehensive and original history of the relationship between fighting men and intoxicants from Antiquity till the present day and looks at how drugs will determine the wars of the future in unforeseen and remarkable ways

The Struggle to Save the Soviet Economy Chris Miller,2016-10-13 For half a century the Soviet economy was inefficient but stable In the late 1980s to the surprise of nearly everyone it suddenly collapsed Why did this happen And what role did Soviet leader Mikhail Gorbachev s economic reforms play in the country s dissolution In this groundbreaking study Chris Miller shows that Gorbachev and his allies tried to learn from the great success story of transitions from socialism to capitalism Deng Xiaoping s China Why then were efforts to revitalize Soviet socialism so much less successful than in China Making use of never before studied documents from the Soviet politburo and other archives Miller argues that the difference between the Soviet Union and China and the ultimate cause of the Soviet collapse was not

economics but politics The Soviet government was divided by bitter conflict and Gorbachev the ostensible Soviet autocrat was unable to outmaneuver the interest groups that were threatened by his economic reforms Miller's analysis settles long standing debates about the politics and economics of perestroika transforming our understanding of the causes of the Soviet Union's rapid demise Russian Politics Today Michael Waller, 2005-07-22 This introductory text written by an established authority on communist and post communist politics describes how Vladimir Putin has turned to those with backgrounds in the military and security structures to provide stability in today's Russian Federation following the democratising reforms of Gorbachev and the ensuing instability of the Yeltsin presidency Against the background of an increasing authoritarianism which has restored features of the Soviet political system it examines the attempts by social and economic groups to assert themselves against the state using embryonic democratic forms that fall far short of pluralism The book's fourteen chapters offer an exceptionally broad coverage It will appeal to first and second year students in higher education but its deliberately accessible style will also make it attractive to the general reader *The Sources of Social Power: Volume 4, Globalizations, 1945-2011* Michael Mann, 2012-12-28 Distinguishing four sources of power ideological economic military and political this series traces their interrelations throughout human history This fourth volume covers the period from 1945 to the present focusing on the three major pillars of post war global order capitalism the nation state system and the sole remaining empire of the world the United States In the course of this period capitalism nation states and empires interacted with one another and were transformed Mann's key argument is that globalization is not just a single process because there are globalizations of all four sources of social power each of which has a different rhythm of development Topics include the rise and beginnings of decline of the American Empire the fall or transformation of communism respectively the Soviet Union and China the shift from neo Keynesianism to neoliberalism and the three great crises emerging in this period nuclear weapons the great recession and climate change Why Did the Soviet Union Collapse?: Understanding Historical Change Robert Strayer, 2016-06-16 Taking the Soviet collapse the most cataclysmic event of the recent past as a case study this text engages students in the exercise of historical analysis interpretation and explanation In exploring the question posed by the title the author introduces and applies such organizing concepts as great power conflict imperial decline revolution ethnic conflict colonialism economic development totalitarian ideology and transition to democracy in a most accessible way Questions and controversies and extracts from documentary and literary sources anchor the text at key points This book is intended for use in history and political science courses on the Soviet Union or more generally on the 20th century From Fear to Fraternity Patricia Rawlinson, 2010-02-02 Organised crime makes good copy Gangsters shoot outs and mob meetings are a staple of TV shows and media reports tend to glamorise the criminal underworld The threat from organised crime has been a high profile concern in Western Europe and the US since the 1930s This being the case the recent emergence of Russian and Eastern European organised crime has led to high profile efforts to combat the new threat with little understanding of what it

entails Patricia Rawlinson argues that burgeoning crime rates result not only from the failures of communism but also from the problems of free market economies Drawing on interviews with members of the Russian criminal underworld she argues that organised crime provides us with a barometer of economic well being both for Russia and for any neoliberal market economy

Patriots and Profiteers R.T. Naylor, 2008-10-16 R T Naylor demonstrates that economic warfare fails almost everywhere it is attempted and that even when it succeeds it has consequences that are not only unintended but also frequently the precise opposite of their advertised result

Globalisation, Religion & Development Mike O'Donnell, Hoshang Noraiee, Dorrie Chetty, Elizabeth Waters, Samane Salimi-Tari, Şevket Alper Koç, Hakkı Cenk, Sermin Sarıca, Alexandra Kelbert, Horacio Gago Priale, Arzu Culhaci, Sibel Fettahoğlu, 2011 Globalisation religion and development have sparked much interest and debates in the last two decades The analysis of religion and especially Islam has been presented in a simplistic notion of linear development and the supposed inability to adapt to modernity and capitalism This journal will consider such views and assess their validity by focusing on Part 1 introducing the theoretical issues and debates surrounding globalisation religion and development illustrating the often contested nature of the concepts and considering the implications for modernity and development Part 2 continuing with the same theme but focusing on gender and development representation of women the effect of modernisation on the increasing consumption of alcohol in Kazakhstan women's access to higher education in revolutionary Iran and finally women and domestic violence Part 3 focusing on case studies to explore the implications of globalisation regionalisation and development in Iran Turkey Sudan Peru and Senegal
