Russian Military Mapping A Guide To The Most Comprehensive Source Of Global Geospatial Intelligence:

Russian Military Mapping, 2005 Russian Military Mapping A. A. Psarev, 2005 The Manual contains information about the atmosphere weather and climate winds time and length of day about terrain and their effect on troop combat operations about topographic and special maps and photographic documents The book presents basic data shown on topographic and special maps the procedure used by unit commanders to maintain their working maps and the effects of meteorological elements on missions and assesses terrain as an element of battlefield conditions **Military Thought**

, 2016 *Russian Grand Strategy in the era of global power competition* Andrew Monaghan, 2022-04-26 This book offers a nuanced and detailed examination of two of the most important current debates about contemporary Russia's international activity is Moscow acting strategically or opportunistically and should this be understood in regional or global terms The book addresses core themes of Russian activity military energy and economic but it offers an unusual multi disciplinary analysis to these themes Monaghan incorporates both regional and thematic specialist expertise to give a fresh perspective to each of these core themes Underpinned by detailed analyses of the revolution in Russian geospatial capabilities and the establishment of a strategic planning foundation the book includes chapters on military and maritime strategies energy security and economic diversification and influence This serves to highlight the connections between military and economic interests that shape and drive Russian strategy *A Cartographic Analysis of Soviet Military City Plans* Martin Davis, 2021-09-29 The collapse of the Soviet Union has seen the emergence of its unprecedentedly comprehensive global secret military mapping project and the commercial availability of a vast number of detailed topographic maps and city plans at several scales This thesis provides an in depth examination of the series of over 2 000 large scale city plans produced in secret by the Military Topographic Directorate of the General Staff between the end of the Second World War and the collapse of the USSR in 1991 After positioning the series in its historical context the nature and content of the plans are examined in detail A poststructuralist perspective introduces possibilities to utilise and apply the maps in new contexts which this thesis facilitates by providing a systematic empirical analysis of the Soviet map symbology at 1 10 000 and 1 25 000 using new translations of production manuals and a sample of the city plans A comparative analysis with the current OpenStreetMap symbology indicates scope for Soviet mapping to be used as a valuable supplementary topographic resource in a variety of existing and future global mapping initiatives including humanitarian crisis mapping This leads to a conclusion that the relevance and value of Soviet military maps endure in modern applications both as a source of data and as a means of overcoming contemporary cartographic challenges relating to symbology design and the handling of large datasets

The Red Atlas John Davies, Alexander J. Kent, 2017-10-17 The utterly fascinating untold story of Soviet Russia's global military mapping program featuring many of the surprising maps that resulted Marina Lewycka author of *A Short History of Tractors in Ukrainian* From 1950 to 1990 the Soviet Army conducted a global topographic mapping program creating large

scale maps for much of the world that included a diversity of detail that would have supported a full range of military planning For big cities like New York Washington D C and London to towns like Pontiac MI and Galveston TX the Soviets gathered enough information to create street level maps The information on these maps ranged from the locations of factories and ports to building heights road widths and bridge capacities Some of the detail suggests early satellite technology while other specifics like detailed depictions of depths and channels around rivers and harbors could only have been gained by Soviet spies on the ground The Red Atlas includes over 350 extracts from these incredible Cold War maps exploring their provenance and cartographic techniques as well as what they can tell us about their makers and the Soviet initiatives that were going on all around us

Leveraging Geospatial Intelligence (GEOINT) in Mission Command ANDY. SANCHEZ, 2025-05-22

The federal government response to Hurricane Katrina demonstrated a vital need for the military to improve the process for assessment response and decision making for all organizations involved Geospatial Intelligence GEOINT is an emerging intelligence discipline that provides detailed data analysis an assessment of the operational environment and a means to investigate problems that may emerge GEOINT is the exploitation and analysis of imagery and geospatial information to describe assess and visually depict physical features and geographically referenced activities By examining the use of geospatial information systems by civilian organizations use of during Hurricane Katrina it was possible to observe that the U S Combatant Commands are underutilizing GEOINT s potential as a tool for information analysis Faced with new and complex problems the military must adapt not only its methods for understanding complex problems but also must integrate new technologies to inform Mission Command GEOINT provides the decision maker or commander the ability to attain shared understanding of the operational environment Joint and Army planning both recognize GEOINT but do not provide a vehicle to reveal its capabilities or how those capabilities can assist the commander with situational understanding Joint and Army planners in COCOMs must follow NORTHCOM s lead and exploit GEOINT modeling capabilities in preparing for new and emerging threats The employment of GEOINT modeling capabilities provides decision makers the ability to visualize the environment prior to conducting operations The military planners limited understanding of GEOINT s capabilities and their tendency to focus on the limited number of useful data sources retards exploitation of geospatial intelligence capabilities in military operations planning The value of GEOINT lies in its ability to bring analysis to inform all stages of commander visualization in mission command This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
