Small-Town Russia Anne White, 2004-08-12 This book examines a number of key questions about social change in contemporary Russia issues such as how people survive when they are not paid for months on end the New Poor the falling birth rate why so many Russian men die in middle age whether regional identities are becoming stronger and how people's sense of Russianness has developed since the creation of the Russian Federation in 1992 It examines these issues by looking at actual experiences in three small Russian towns It includes a great deal of original ethnographic research and by looking at real places overall provides a good sense of how different aspects of social change are interlinked and how they actually affect real people's lives **Russian Westernizers and Change in International Relations** Andrei P.

Tsygankov, 2024-06-07 *Russian Westernizers and Change in International Relations* summarizes the Westernizing trend in

Russian thought from the early nineteenth century to the present day This book looks at Russian thinkers and politicians who have considered Western European civilization to be superior to others and who have drawn the conclusion that Russia consequently ought to align itself with the West rather than preserving certain traditional Russian values and that not doing so is an impediment to political social and economic evolution Within this trend of thought the author identifies four schools Christian Westernizers Economic Liberals Political Liberals and Social State Supporters and explores examples of each The author compares Russian thinkers from different periods finding contrasts and similarities within their political and historical settings and assessing their responses to their unique circumstances He analyzes Russian Westernizers self definition and ideas of national freedom relative to those of Western nations exploring how the West s definition of values and institutions has changed over time He shows how Western historical developments affected waves of Westernization and pro Western thinking inside Russia arguing the importance of this being grounded in national state building priorities The growing complexity of global relations the declining global influence of the West and the war in Ukraine present Russian Westernizers with new questions and challenges and this book assesses the resulting implications This book will appeal to students and scholars of Russian foreign policy Russia West relations IR theory diplomatic studies political science and European history including the history of ideas

Mothers and Soldiers Amy Caiazza,2002-09-27 As the Soviet communist regime gave way to democracy the emergence of an entirely new political and social landscape had the potential to turn Russian society upside down In Mothers and Soldiers Organizing Men and Women in 1990s Russia Amy Caiazza looks at the effects of this seismic change on gender roles and specifically the role of women in a newly democratic Russia By observing through a gendered lens institutions like the military and the process of making public policy Caiazza finds that despite the institutional disruption the pattern of gender role ideologies maintained continuity from the former times while at the same time embracing aspects of Western feminism

Building Democracy in Contemporary Russia Sarah Henderson,2003 Can foreign donors help build new democracies In the 1990s public and private organizations such as USAID and the Soros Foundation poured huge amounts of money and expertise into Russia to help build the dream of a vibrant democratic society Sarah L Henderson argues that despite the altruistic intentions of foreign assistance agencies and domestic activists foreign aid designed to spur civic growth has had unintended consequences Drawing on extensive field work survey research and work experience for several funding agencies in Moscow in the late 1990s Henderson focuses on donor efforts to support the emerging community of nongovernmental organizations and in particular on efforts to build a functioning women s movement in Russia Her intimate knowledge of Russia s growing NGO community informs a worrisome finding foreign aid has made a tremendous difference but not in altogether expected or positive ways New Russian civic groups serve either the needs of an indigenous clientele or the demands of the foreign aid bureaucracy but rarely both Henderson s research and experience show that while aid has kept a fledgling civic community alive it is a civic community that is disconnected from its

own domestic audience The book suggests that large flows of foreign aid have in some ways damaged the long term prospects for democratization in Russia Russia Robert Service,2003 The first history of modern Russia from 1991 to the present day by one of the leading historians of the 20th century USSR and Russia In 1991 in a huge experiment with a people and in a state of euphoria Boris Yeltsin abolished the USSR and recreated the Russian nation At the point of its declaration is was in a state of economic and social disarray and yet there were high hopes Hopes which have subsequently been dashed Robert Service brings to bear his vast knowledge of the people and the country to put the recent upheavals into context and he shows that not everything changed for the worst 1991 The Gorbachev years have allowed the Russian people to give a priority to living a private life and shutting the door on the state They could think what they liked They could enjoy intellectual and religious freedom and indulge in recreations their income would allow Gays and Lesbians could come out The Youth culture could finally be loosed from constraints This is a broad political social and cultural history of one of the newest nations ever to be formed The Weakness of Civil Society in Post-Communist Europe Marc Morjé Howard,2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia
