Russias Chechen Wars 1994 2000 Lessons From The Urban Combat:

Russia's Chechen Wars 1994-2000 Olga Oliker, 2001-09-28 An examination of the difficulties faced by the Russian military in planning and carrying out urban operations in Chechnya Russian and rebel military forces fought to control the Chechen city of Grozny in the winters of 1994 1995 and 1999 2000 as well as clashing in smaller towns and villages The author examines both Russian and rebel tactics and operations in those battles focusing on how and why the combatants' approaches changed over time The study concludes that while the Russian military was able to significantly improve its ability to carry out a number of key tasks in the five year interval between the wars other important missions particularly in the urban realm were ignored largely in the belief that the urban mission could be avoided This conscious decision not to prepare for a most stressful battlefield met with devastating results a lesson the United States would be well served to study

Russia's New Generation Urban Warfare Umer Khan, Muhammad Ali Baig, 2025-07-13 Since the end of the Cold War the Russian military approach has been developing alongside its evolving strategic challenges The period under study 1991 2020 is important for Russia as it witnessed its Western rivals transition from the Cold War to Global War on Terror and the one of Great Power Competition Western interference in Russia's neighbouring countries and the surfacing of colour revolution against autocratic states were concerning to the Russian Federation This study intends to probe the Russian approach to urban warfare in the context of new strategic challenges since the end of the cold war 1991 2020 In this research the Russian strategic challenges and threats and the evolution of Russian military doctrine and thinking pertinent to fighting in the urban areas will be explored The research will analyse the efficacy of the Russian Military's New Generation Approach in contemporary urban battlespace as demonstrated in recent conflicts

The Chechen Wars Matthew Evangelista, 2004-05-13 Following the breakup of the Soviet Union Boris Yeltsin improvised a system of asymmetric federalism to help maintain its successor state the Russian Federation However when sparks of independence flared up in Chechnya Yeltsin and later Vladimir Putin chose military action to deal with a brushfire that they feared would spread to other regions and eventually destroy the federation Matthew Evangelista examines the causes of the Chechen Wars of 1994 and 1999 and challenges Moscow's claims that the Russian Federation was too fragile to withstand the potential loss of one rebellious republic He suggests that the danger for Russia lies less in a Soviet style disintegration than in a misguided attempt at authoritarian recentralization something that would jeopardize Russia's fledgling democratic institutions He also contends that well documented acts of terrorism by some Chechen fighters should not serve as an excuse for Russia to commit war crimes and atrocities Evangelista urges emerging democracies like Russia to deal with violent internal conflict and terrorism without undermining the fundamental rights and freedoms of their citizens He recommends that the United States and other democracies be more attentive to Moscow's violations of human rights and in their own struggle against terrorism provide a kind of role model

Guerrilla Warfare Tactics In Urban Environments Major Patrick D.

Marques,2014-08-15 Current Special Forces doctrine is very limited concerning the conduct of guerrilla warfare combat operations in urban environments The focus of the current doctrine is on conducting combat operations in rural environments The material available on urban environments is defined in broad terms primarily focused on the larger picture of unconventional warfare Some considerations and characteristics of urban tactical operations are addressed but are so general they could be applied to a conventional infantry unit as easily as to a guerrilla force Traditionally Special Forces guerrilla warfare doctrine has focused on its conduct in a rural environment as historically most guerrilla movements have formed operated and been supported outside of the cities Increasing world urbanization is driving the center of gravity of the resistance the populace and their will to resist into urban settings As populations have gravitated to the cities on every continent the ability to prosecute a successful guerrilla war has often depended on the ability to conduct combat operations in these environments Predominantly the aspects of unconventional warfare that were executed in urban settings were those such as intelligence activities recruiting sabotage or subversion Guerrilla warfare combat operations were done in urban environments only when absolutely necessary

The EU-Russia Strategic Partnership Hiski Haukkala,2010-02-25 This book explores why despite the initial promise and enthusiasm at the beginning of the 1990s the European Union EU and the Russian Federation have encountered severe difficulties in developing their institutionalised relationship

Chechnya at War and Beyond Anne Le Huérou,Aude Merlin,Amandine Regamey,Elisabeth Sieca-Kozłowski,2014-09-15 The Russia Chechen wars have had an extraordinarily destructive impact on the communities and on the trajectories of personal lives in the North Caucasus Republic of Chechnya This book presents in depth analysis of the Chechen conflicts and their consequences on Chechen society It discusses the nature of the violence examines the dramatic changes which have taken place in society in the economy and in religion and surveys current developments including how the conflict is being remembered and how Chechnya is reconstructed and governed

Urban Guerrilla Warfare Anthony James Joes,2007-04-20 Guerrilla insurgencies continue to rage across the globe fueled by ethnic and religious conflict and the easy availability of weapons At the same time urban population centers in both industrialized and developing nations attract ever increasing numbers of people outstripping rural growth rates worldwide As a consequence of this population shift from the countryside to the cities guerrilla conflict in urban areas similar to the violent response to U S occupation in Iraq will become more frequent Urban Guerrilla Warfare traces the diverse origins of urban conflicts and identifies similarities and differences in the methods of counterinsurgent forces In this wide ranging and richly detailed comparative analysis Anthony James Joes examines eight key examples of urban guerrilla conflict spanning half a century and four continents Warsaw in 1944 Budapest in 1956 Algiers in 1957 Montevideo and S o Paulo in the 1960s Saigon in 1968 Northern Ireland from 1970 to 1998 and Grozny from 1994 to 1996 Joes demonstrates that urban insurgents violate certain fundamental principles of guerrilla warfare as set forth by renowned military strategists such as Carl von Clausewitz and Mao Tse tung Urban guerrillas operate

in finite areas leaving themselves vulnerable to encirclement and ultimate defeat They also tend to abandon the goal of establishing a secure base or a cross border sanctuary making precarious combat even riskier Typically urban guerrillas do not solely target soldiers and police they often attack civilians in an effort to frighten and disorient the local population and discredit the regime Thus urban guerrilla warfare becomes difficult to distinguish from simple terrorism Joes argues persuasively against committing U S troops in urban counterinsurgencies but also offers cogent recommendations for the successful conduct of such operations where they must be undertaken **Blue Helmets and Black Markets** Peter Andreas,2008 In Blue Helmets and Black Markets Peter Andreas traces the interaction between these formal front stage and informal backstage activities arguing that this created and sustained a criminalized war economy and prolonged the conflict in a manner that served various interests on all sides Although the vast majority of Sarajevans struggled for daily survival and lived in a state of terror the siege was highly rewarding for some key local and international players This situation also left a powerful legacy for postwar reconstruction new elites emerged via war profiteering and an illicit economy flourished partly based on the smuggling networks built up during wartime Andreas shows how and why the internationalization of the siege changed the repertoires of siege craft and siege defenses and altered the strategic calculations of both the besiegers and the besieged The Sarajevo experience dramatically illustrates that just as changes in weapons technologies transformed siege warfare through the ages so too has the arrival of CNN NGOs satellite phones UN peacekeepers and aid convoys Drawing on interviews reportage diaries memoirs and other sources Andreas documents the business of survival in wartime Sarajevo and the limits contradictions and unintended consequences of international intervention BOOK JACKET

Urbicide Martin Coward,2008-09-30 The term urbicide became popular during the 1992 95 Bosnian war as a way of referring to widespread and deliberate destruction of the urban environment Coined by writers on urban development in America urbicide captures the sense that the widespread and deliberate destruction of buildings is a distinct form of violence Using Martin Heidegger s notion of space and Jean Luc Nancy s idea of community Martin Coward outlines a theoretical understanding of the urban condition at stake in such violence He contends that buildings are targeted because they make possible a plural public space that is contrary to the political aims of ethnic nationalist regimes Illustrated with reference to several post Cold War conflicts including Bosnia Chechnya and Israel Palestine this book is the first comprehensive analysis of organised violence against urban environments It offers an original perspective to those seeking to better understand urbanity political violence and the politics of exclusion Out of the Mountains David Kilcullen,2015-05-28 A leading expert on counterinsurgency and counterterrorism offers a comprehensive theory of competitive control that will apply to the future of conflict in a world of explosive population growth increased urbanization the movement of population centers to the coasts and global connective networks
