Beillevaire, 2002 **Ryūkyū Studies to 1854** Patrick Beillevaire, 2000 This collection gathers all the primary texts some rare or hitherto unpublished written on Ryukyu by Western visitors scholars and missionaries from the 16th century to the eve of World War II This first set of five volumes covers the period up to the arrival of Commodore Perry in 1854 It is of interest to historians and anthropologists as well as to everyone who wants to understand the background of Okinawa's persistent distinctiveness and of its complex relations with the Japanese governments East Asian Maritime World

Vierzehnhundert Bis Achtzehnhundert Angela Schottenhammer, 2007 The volume is a collection of studies discussing aspects of the political economy and raison d'état of East Asian countries especially against the background of East Asia's integration into the international trade The contributions progress from the general to the particular the first contribution above all taking a broad perspective intended as a general outline of the political and economic history of this macro region The other contributions examine the East Asian world order in ideology and reality long perspective supra regional flows of money between China and the outer world the role of castaways and sea routes between Korea and China Sino Japanese relations in the mid sixteenth century the trade between China and Nagasaki aspects of Sino Ryukyuan relations and the role of translators in the East Asian maritime world The eighteenth century plays a key role in many contributions and time and again the reader will meet with groups of persons who played a particular role within the exchange networks of this early modern period such as monks acting as diplomats or interpreters **Unpredictable Agents** Mari Yoshihara, 2021-10-31 In

**Unpredictable Agents** twelve Japanese scholars of American studies tell their stories of how they encountered America and came to dedicate their careers to studying it People in postwar Japan have experienced America in a number of ways through literature material goods popular culture foodways GIs missionaries art political figures celebrities and business As the Japanese public wrestled with a complex mixture of admiration and confusion yearning and repulsion closeness and alienation toward the US Japanese scholars specializing in American studies have become interlocutors in helping their compatriots understand the country In scholarly literature these intellectuals are often understood as complicit agents in US Cold War liberalism By focusing on the human dimensions of the intellectuals' lives and careers **Unpredictable Agents** resists such a deterministic account of complicity while recognizing the relationship between power and knowledge and the historical and structural conditions in which these scholars and their work emerged How did these scholars encounter

America in the first place and what exactly constitutes the America they have experienced How did they come to be Americanists and what does being Americanists mean for them In short what are the actual experiences of Japan s Americanists and what are their relationships to America Reflecting both the interlocked web of politics economics and academics as well as the evolving contours of Japan s Americanists the essays highlight the diverse paths through which these individuals have come to be Americanists and the complex meanings that identity carries for them The stories reveal the obvious yet often neglected fact that Japanese scholars neither come from the same backgrounds nor occupy similar identities solely because of their shared ethnicity and citizenship The authors were born in the period ranging from the 1940s to the 1980s in different parts of Japan from Hokkaido to Okinawa and raised in diverse familial and cultural environments which shaped their identities as Japanese and their encounters with America in quite different ways Together the essays illustrate the complex positionalities fluid identities ambivalent embrace and unpredictable agency of Japan s Americanists who continue to chart their own course in and across the Pacific

**Kyushu: Gateway to Japan** Andrew Cobbing, 2008-12-18 In this first major study of the region in English the author examines the key themes of Kyushu s history from earliest times the cultural interaction with the continental mainland settlement location and infrastructure as well as trade and commerce arguing that it was the principal stepping stone in terms of Japan s cultural social and economic advance through history up to the present day Although an integral part of Japan Kyushu is culturally distinct in that its location on the East China Sea has exposed the region to an unusually high degree of influence from overseas There was diplomatic exchange between this island and China for example even before the political entity of Japan came into existence Kyushu in fact has been the setting for many of the major cultural encounters in Japan s history from the introduction of Buddhism Confucianism and Christianity to gunpowder coffee and tea The volume also includes a colour plate section containing 60 images which support the text and provide the reader researcher with invaluable pictorial references to Kyushu s history from earliest times to the present day

Emigration to South America from Japan and the Ryukyu Islands Pedro Iacobelli, 2017-07-13 Placing a distinct focus on the role of the sending state this book examines the history of postwar Japan's migration policy linking it to the larger question of statehood and nation building in the postwar era Pedro Iacobelli delves into the role of states in shaping migration flows by exploring the genesis of the state led emigration from Japan and the US administered Ryukyu Islands to South America in the mid 20th century The study proposes an alternative political perspective on migration history to analyze the rationale and mechanisms behind the establishment of migration programs by the sending state To develop this perspective the book examines the state's emigration policies their determinants and their execution for the Japanese and Okinawan migration programs to Bolivia in the 1950s It argues that the post war migration policies that established those migration flows were a result of the political cost benefit calculations rather than only economic factors of the three governments involved With its unique focus on the role of the sending state and the relationship between Japan Okinawa and the United States this is a valuable study for students and scholars of postwar Japan and migration history The Boundless Sea Gary Y.

Okihiro, 2019-09-24 The last book in a trilogy of explorations on space and time from a preeminent scholar The Boundless Sea is Gary Y Okihiro's most innovative yet Whereas Okihiro's previous books Island World and Pineapple Culture sought to deconstruct islands and continents tropical and temperate zones this book interrogates the assumed divides between space and time memoir and history and the historian and the writing of history Okihiro uses himself from Okinawan roots growing up on a sugar plantation in Hawai'i researching in Botswana and teaching in California to reveal the historian's craft involving diverse methodologies and subject matters Okihiro's imaginative narrative weaves back and forth through decades and across vast spatial and societal differences theorized as historical formations to critique history's conventions Taking its title from a translation of the author's surname The Boundless Sea is a deeply personal and reflective volume that challenges how we think about time and space notions of history **Trade and Transfer Across the East Asian "Mediterranean"**

Angela Schottenhammer, 2005 The present volume is a collection of studies discussing trade and exchange relations across the East China Sea in the time period between c 1400 and 1840 It introduces and analyses characteristics of trade and exchange of economic and personal networks including knowledge transfer between East Asian countries the importance of which has for a long time been underestimated or misinterpreted The authors want to show that from the fifteenth to the early nineteenth century East Asia was far from being a group of more or less isolated states but was characterised by multifarious contacts and connections The countries or regions investigated include China Japan Korea the Ryukyu Islands and Tsushima The contributions are subdivided according to topical themes and focus on sea and land routes archaeology trade and commodity exchange knowledge transfer and exchange in the field of medicine including physicians and European images of parts of East Asia Examining a great deal of sources ranging from diaries letters tomb inscriptions to commodity lists and government documents this volume sheds more light into hitherto neglected aspects of maritime trade Guide to
