Sheffield, 2014-04-30 Nowadays globalization processes have become all embracing But at the same time despite the ever increasing flow of publications on globalization our understanding and knowledge of it still leaves much to be desired Especially it concerns the global processes in general of which globalization is a part We also need to systematize our ideas about globalization and Global Studies to somehow fit the realities In particular this concerns the education process because the current state of education will determine the way people will perceive reality in the forthcoming decades This yearbook aims at contributing to the solution of these important tasks It is the third in the series of yearbooks titled Globalistics and Globalization Studies This year it has the following subtitle Aspects Dimensions of Global Views Its authors consider globalization and Global Studies in different dimensions and aspects philosophical methodological and pedagogical in terms of various processes problems and perspectives Of course to some extent this means that this yearbook presents rather diverse materials But globalization itself is very diverse And its comprehension may proceed in the framework of different theoretical approaches and points of view In the present yearbook one can find perceptions of globalization and Global Studies by a number of scholars from different countries of the world and learn rather peculiar visions of globalization by the Russian scientists and educators The yearbook will be interesting to a wide range of researchers teachers students and all those who pay attention to global issues Information India 1992-93 : Global View S. P. Agrawal, 1994 *The Geopolitics of Australia's Regional Relations* D. Rumley, 2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle Upon Tyne I was very fortunate to graduate among its extremely capable sporty and enthusiastic class of 68 from where several academic geographers emerged Equally fortunately some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada At the University of British Columbia I was supervised at different times by Julian Minghi and Victor Prescott both of whom are not only extremely capable academics but are also very fine people I owe an enormous debt to John Julian and Victor and to the British and Canadian taxpayers who provided financial support for my University studies In 1974 I began an academic career at the University of Western Australia where I have been ever since save for a two year period from 1991-3 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo Viewing Australia and the Asia Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact I am especially grateful for the support provided by so many Japanese academic colleagues and friends beginning as early as 1976 Three individuals deserve special mention for their help guidance and enduring friendship George Ohshima Hiroshi Tanabe and Akihiro Kinda Sustainable Development, Regional Governance, and International Organizations Anastassia Obydenkova, 2024-06-28 This book aspires to establish a dialogue among the studies of sustainable development global environmental politics comparative regionalism and area studies of Eurasia The chapters in this book reflect deep knowledge of the authors of the main trends in environmental politics at global

international and national levels before the invasion in Ukraine in 2022 First the book looks into the role and impact of international organizations such as the European Union EU European Bank for Reconstruction and Development EBRD Arctic Council AC and Global Forums on Climate Action on post Communist states but also the role of nation states e g Russia Kazakhstan and China Second the book explores relatively new international organizations such as the Eurasian Economic Union EAEU the Eurasian Development Bank and the Shanghai Cooperation Organization SCO How do the EAEU EDB and the SCO matter if at all in promoting an environmental agenda How do the EU EBRD and the AC advance the environmental agenda across the post Communist region This book aspires to answer these questions and to shed more light on the challenges to sustainable development in post Communist Europe Central Asia and Eurasia With a new foreword and afterword this book will appeal to students scholars and researchers of political science international relations area studies as well as practitioners and policymakers working in international organizations and dealing with challenges of sustainable development The other chapters were originally published as a special issue of Problems of Post Communism

China's Regional Relations in Comparative Perspective Steven F. Jackson, 2018-02-06 China's relations with its neighbors have evolved since 1949 and in the 21st century many scholars argue that China's rising power has led it to be increasingly domineering over those smaller countries in Northeast Southeast Central and South Asia The evolution of China's regional relations needs to be examined comprehensively since China counts twenty seven countries as its neighbors large and small While China's official policy toward all of these countries is to treat them as good neighbors and partners some of these relationships have been spectacularly deteriorating while others have been quietly improving over the last two decades Jackson takes a comparative foreign policy approach and compares China's status as a regional hegemon with the United States Russia India Brazil South Africa and Nigeria The result is a broader theory as to why regional powers are sometimes intimidating and at other times accommodating An important contribution to studies on China this book will prove useful to scholars and students in Chinese and Asian foreign policy comparative foreign policy and international relations

Psychology Education and Training Rainer Silbereisen, Pierre Ritchie, Janak Pandey, 2014-01-10 Much of the psychological research in the last century has been conducted in the global North West hence many prevailing theories and methodologies reflect the philosophical framework and shared cultural knowledge of this region Other world views and cultural contexts have as yet not had the same opportunity to develop scientific insights that come to the attention of global audiences Psychology Education and Training is the first truly international effort to generate a framework for common standards in psychological education and training across the globe Psychologists have long studied human beings in their socio cultural context New challenges such as globalisation and the relationship of the brain and behavior require that education and training keep pace with these rapidly evolving developments The chapters in this book were generated by an international conference which resulted in the Dornburg Accord While anchored in higher education the focus is on the

Authoritarian Regionalism in the World of International Organizations Anastassia V. Obydenkova, Alexander Libman, 2019-05-02 The interconnection between international organizations IOs membership and democratization has become a topic of intense debate However the main focus of the literature so far has been on IOs created by democratic states and comprised mostly of democracies for examples the European Union In contrast to existing studies this book focuses on another group of regional IOs referred to as non democratic IOs which are organizations founded by autocracies How do these newly emerged organizations interrelate and interact with the outside world How do they counteract and confront the danger of democratization in their own member states and neighboring states This book aims to address these questions by developing a new theory of authoritarian regionalism and by combining both quantitative and qualitative analysis to test it The quantitative analysis uses a large dataset of all regional organizations worldwide for the post World War II period with the aim of defining historical trends in development and the modification of regionalism over the last seven decades 1945 2015 Qualitative analysis refines and develops the argument by looking at the case of post Soviet Eurasia The book uncovers a new type of regionalism authoritarian regionalism and traces its historical roots as well as its implications for modern politics The book is the first attempt to systematically investigate the functioning and the impact of authoritarian regionalism as a new phenomenon as well as its implications for democratization world wide The book contributes to the theory of regionalism international organizations studies of autocracies foreign policy and democratization world wide
