It also offers an up-to-date rigorous academic analysis of various issues related to low intra-regional trade in South Asia, prevalence of tariff barriers, incidence of a range of non-tariff measures, challenges of weak trade-related infrastructure and the need for trade facilitation, the political economics of regional integration, highlighting how bilateral political relations affect the integration process, low level of intra-regional investment, South Asia's pattern of integration with the global and regional value chains, pattern and dominance of informal trade and alternative regional integration initiatives in South Asia such as the bilateral regional and sub-regional trade agreements within and countries outside this region. Intended primarily for researchers and students of international trade and policymakers from South Asia and beyond, the book is also a valuable supplementary reference resource for researchers and students.
