Barth, Benno Böer, 2002-03-31 Contains 31 contributions presenting the results of recent decades research on the extensive intertidal and inland saline flats of the Arabian Gulf Region known colloquially as sabkhat Only relatively recently acknowledged to be valuable ecosystems with research development and conservation value sabkhat are thoroughly explored in this volume by biologists geologists archaeologists ecologists botanists zoologists and other researchers and scientists from many countries The volume s 31 contributions are organized into three sections distribution of sabkhat within the Arabian Peninsula and the adjacent countries 13 sabkha ecology 14 and sabkha land use and development 4 The book includes some fairly low key b w photographs charts and maps Annotation copyrighted by Book News Inc Portland OR

Sabkha Ecosystems M. Ajmal Khan, Benno Böer, Münir Öztürk, Thabit Zahran Al Abdessalaam, Miguel Clüsener-Godt, Bilquees Gul, 2014-05-12 Sustainable development is the key for the survival in 21st century The natural resources are finite and cannot be used with impunity because we are the custodian of these resources and have responsibility to pass these to the next generation This monumental task requires several major commitments and most important of them is to arrest population explosion which has already reached seven billion Natural resources like air to breath food to eat and water to drink and fossil fuel to maintain this life style are being overexploited Unrestrained consuming culture will accelerate undesired situation This situation will have more dire consequences in resource limited ecosystems like dry lands Given the severe scarcity of water ever increasing population and soil salinization out of the box solutions for the provision of food and clean energy is required to spare meager fresh water resources for conventional agriculture This volume contains a number of articles dealing with halophyte ecology bio geography ecophysiology hyper saline soils biofuels biosaline agriculture biosaline landscaping climate change mitigation and biodiversity It also contains the communication of innovative ideas such as the research into floating mangroves seagrass terraces as well as a World Halophyte Garden containing all known salt tolerant plant species It is hoped that the information provided will not only advance vegetation science but that it will truly generate more interdisciplinarity networking awareness and inspire farmers

and agricultural and landscaping stakeholders to seriously engage in halophyte cash crop production in coastal hyper saline areas **Sabkha Ecosystems** M. Ajmal Khan,Benno Boër,Münir Öztürk,Miguel Clüsener-Godt,Bilquees Gul,Siegmar-W.

Clüsener-Godt,Hiroyuki Matsuda,Benno Böer,Ronald A. Loughland,2024-10-14 Blue carbon ecosystems are of tremendous value toward the utilization of high salinity water such as seawater as well as hyper saline soils and salt tolerant biota for the production of biomass for food feed fiber fuel other economic purposes and carbon sequestration In order to achieve the 17 SDGs the scientific research into blue carbon ecosystems is an absolutely important element Moreover monitoring is needed as well as the conservation of the remaining blue carbon ecosystems and the restoration of lost habitat The book will provide comprehensive scientific documentation inspiring the way forward on how to utilize saline resources in the best interest of humanity It will try to foster the academic research and networking for land users politicians development banks innovative farmers investors energy producers and carbon off setters The papers presented in this book emanate from a conference held at the Yokohama National University Japan in January 2023 **Sabkha Ecosystems** ,2002 **Protecting the Gulf's**

presents studies on a range of topics related to the marine environment of the Red Sea and Arabian Persian Gulf This book contains invited and peer reviewed chapters from diverse researchers active in their respective fields The chapters offer new data and include a comprehensive lists of references Some of the main topics included in the book are pollution from heavy metals and petroleum hydro environmental characteristics of the seas conservation of marine ecosystems risk of climate change on the Red Sea region and the mangrove environment With new developments occurring in the coastal regions in recent decades the book will be not only a helpful resource to researchers but also be a valuable reference for anyone curious about managing the marine and littoral environment of these two unique seas

Halophyte Plant Diversity and Public Health Münir Öztürk,Volkan Altay,Moona Nazish,Mushtaq Ahmad,Muhammad Zafar,2023-03-01 Salinity is one of the acute problems causing enormous yield loss in many regions of the world This phenomenon is particularly pronounced in arid and semiarid regions Halophytes can remove salt from various types of problematic soils due to their unique morphological physiological and anatomical adaptations to these environments Halophytes are also used for the treatment of certain diseases but scientific documentation in terms of current phytotherapeutic applications is deficient in this unique group of plants Different ethnic groups around the world use medicinal halophytes according to their own beliefs and ancestor s experiences However their knowledge about the use of salt tolerant medicinal plants is usually confined to their own community There is thus a knowledge gap on halophytes which should be bridged and preserved This book provides a comprehensive account on the distribution of halophytes their ethnobotanical and medicinal aspects economic importance and chemical constituents along with scientific description The book therefore serves as a valuable resource for professionals and researchers working in the fields of plant stress biology and ethnobotanical aspects

Mangrove Ecosystems of Asia I. Faridah-Hanum,A. Latiff,Khalid Rehman Hakeem,Munir Ozturk,2013-11-01 The book provides an up to date account of mangrove forests from Asia together with restoration techniques and the management requirements of these ecosystems to ensure their sustainability and conservation All aspects of mangroves and their conservation are critically re examined The book is divided into three sections presenting the distribution and status of mangrove ecosystems in Asia the challenges they are facing their issues and opportunities and the management strategies for their conservation

Advances in Coastal Ecology - Processes, Patterns, and Services ,2025-03-05 Most of the world s human population lives along the coast where ecosystems are subject to the environmental degrading impacts brought by the increasing use of plastics loss of coastal buffers from storms like mangrove forests and decreasing biodiversity from which ecosystem services spring from In many cases as the effects of these changes become more widespread regions lacking basic information like the knowledge of what animals reside along a coastline are being threatened These developments occur on the complex backdrop of natural processes that shape the geological and sedimentary features of the shore The clash of the timescales of these changes short for human mediated impacts and long for geological ones creates thought provoking contrasts and gives insight into what the

future may hold for coastal ecosystems This book presents current research exploring solutions exposing effects and describing biological and geological coastline features for the first time in understudied regions of the world It is an essential text for libraries classrooms where coastal ecology is taught and the general readership interested in coastal ecosystems

Mangroves and Halophytes Helmut Lieth,Maxímo García Sucre,Brigitte Herzog,2008-02-02 Focusing on Venezuela and Mexico this edited volume from the International Society of Halophyte Utilisation ISHU explores the environmental issues facing South and Central America s coastal ecosystems and discusses the uses of mangrove species and other halophytes in addressing issues of both coastal pollution and upland soil salinisation The book draws on expertise from Europe and South America to present a series of case studies that detail Venezuela s saline ecosystems and examine the economic potential of mangrove restoration and halophyte production It includes cutting edge research into the establishment of new mangrove stands which could serve as prototypes for the sustainable use of halophytes including *Chenopodium quinoa* and *Tamarix aphylla* Moreover the detailed examples from Venezuela and other Caribbean countries provide useful models for comparison with halophyte utilisation in other parts of the world especially the Mediterranean region where much of the earlier research of the ISHU had been conducted Including insights from 50 years of research on the Venezuelan coastline this unique book provides a useful reference for researchers working on saline ecosystems and economically useful halophytes around the world

Biorefinery Juan-Rodrigo Bastidas-Oyanedel, Jens Ejbye Schmidt, 2019-04-15 This book discusses the biorefinery of biomass feedstocks In depth chapters highlight the scientific and technical aspects and present a techno economic analysis of such systems By using a TEA approach the authors present feasible pathways for the conversion of biomass both residual biomass energy crops and algae biomass showing the different possibilities for the production of biochemical materials biofuels and fertilizers The concepts presented in this book will link companies investors and governments by providing a framework that will help reduce pollutants and create a biomass related economy that incorporates the newest developments and technologies in the area

Ecophysiology, Abiotic Stress Responses and Utilization of Halophytes Mirza Hasanuzzaman, Kamrun Nahar, Münir Öztürk, 2019-04-12 Halophytes are those plant species that can tolerate high salt concentrations There are diversified species of halophytes suited for growth in various saline regions around the world e g coastal saline soil soils of mangrove forests wetlands marshlands lands of arid and semiarid regions and agricultural fields These plants can be grown in soil and water containing high salt concentrations and unsuitable for conventional crops and can be good sources of food fuel fodder fiber essential oils and medicine Moreover halophytes can be exploited as significant and major plant species for the desalination and restoration of saline soils as well as phytoremediation This book highlights recent advances in exploring the unique features of halophytes and their potential uses in our changing environment
