The Paradise of God Norman Wirzba, 2003-09-11 And God said Let us make man in our image after our likeness and let them have dominion over the fish of the sea and over the fowl of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth Gen 1 26 It has become a commonplace that Biblical religion bears a heavy share of responsibility for our destruction of the environment and this passage from the King James version of the Bible exemplifies what is generally believed to be the Biblical attitude toward the earth In this provocative book however Norman Wirzba argues that the doctrine of creation when understood as a statement about the moral and spiritual meaning of the world actually holds the key to a true understanding of our place in the environment and our responsibility toward it Wirzba contends that an

adequate response to environmental destruction depends on a new formulation of ourselves as part of a created whole rather than as autonomous unencumbered individuals Drawing on the work of biblical scholars ecologists agrarians philosophers theologians and cultural critics Wirzba develops a comprehensive worldview that grows out of the idea that the world is God's creation While the text of Genesis has historically encouraged a vision of persons as masters of creation a more theologically and ecologically sensitive rendering he says would be to say that we are servants of creation Our present culture Wirzba believes results from a denial of creation that has caused modern problems as diverse as rootlessness individualism careerism boredom and consumerism The recovery of the meaning of creation can lead to a renewed sense of human identity and vocation and happier more peaceful lives He concludes by offering practical advice for individuals who wish to begin the work of transformation and renewal Moving beyond the usual political debates The Paradise of God presents a compelling vision of a new religious environmentalism *Olympic Battleground* Carsten Lien,2000-08-31 A shocking revelation No one vitally interested in the past present or future of the national parks can afford to ignore this work of historical dynamite This is the first comprehensive history of Olympic National Park A case study of the need for citizen action to protect our natural areas As a seasonal ranger in Olympic National Park early in his career Carsten Lien discovered the shocking truth Flouting the law and contrary to public expectation the National Park Service was logging the very land it was supposed to preserve Lien vowed to uncover the story behind the destruction In *Olympic Battleground* Lien documents more than one hundred years of political chicanery citizen activism bureaucratic failure and the loss of primeval forest This classic in historical investigation is now updated with a new chapter on the most recent preservation challenges confronting the park *Earth Jurisprudence* Peter D. Burdon,2014-09-19 The idea of human dominion over nature has become entrenched by the dominant rights based interpretation of private property Accordingly nature is not attributed any inherent value and becomes merely the matter of a human property relationship *Earth Jurisprudence Private Property and the Environment* explores how an alternative conception of property might be instead grounded in the ecocentric concept of an Earth community Recognising that human beings are deeply interconnected with and dependent on nature this concept is proposed as a standard and measure for human law This book argues that the anthropocentric institution of private property needs to be reconceived drawing on international case law indigenous views of property and the land use practices of agrarian communities Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature Using the theory of earth jurisprudence as a guide he outlines an alternative ecocentric description of private property as a relationship between and among members of the Earth community This book will appeal to those researching in law justice and ecology as well as anyone pursuing an interest more particularly in earth jurisprudence **Dark Green Religion** Bron Raymond Taylor,2010 A love of green may be a human universal Deepening the palette of green scholarship Bron Taylor proves remarkably to be both an encyclopedist and a visionary Jonathan Benthall author of *Returning to Religion*

Why a Secular Age is Haunted by Faith This important book provides insight into how a profound sense of relation to nature offers many in the modern world a vehicle for attaining a spiritual wholeness akin to what has been historically associated with established religion In this sense Dark Green Religion offers both understanding and hope for a world struggling for meaning and purpose beyond the isolation of the material here and now Stephen Kellert Yale University School of Forestry and Environmental Studies In this thought provoking volume Bron Taylor explores the seemingly boundless efforts by human beings to understand the nature of life and our place in the universe Examining in depth the ways in which influential philosophers and naturalists have viewed this relationship Taylor contributes to the further development of thought in this critically important area where our depth of understanding will play a critical role in our survival Peter H Raven President Missouri Botanical Garden Carefully researched strongly argued originally conceived and very well executed this book is a vital contribution on a subject of immense religious political and environmental importance It s also a great read Roger S Gottlieb author of A Greener Faith Religious Environmentalism and our Planet s Future A fascinating analysis of our emotional and spiritual relationship to nature Whether you call it dark green religion or something else Bron Taylor takes us through our spiritual relationship with our planet its ecosystems and evolution in an enlightened and completely undogmatic manner Dr Claude Martin Former Director General World Wildlife Fund An excellent collection of guideposts for perplexed students and scholars about the relationships of nature religions spirituality animism pantheism deep ecology Gaia and land ethics and for the environmentalist seeking to make the world a better place through green religion as a social force Fikret Berkes author of Sacred Ecology Traditional Ecological Knowledge and Resource Management Dark Green Religion shows conclusively how nature has inspired a growing religious movement on the planet contesting the long reign of many older faiths Taylor expertly guides us through an astonishing array of thinkers past and present who have embraced in part or whole the new religion I was thoroughly convinced that this movement has indeed become a major force on Earth with great potential consequences for our environmental ethics Donald Worster University of Kansas In this exceptionally interesting and informative book Bron Taylor has harvested the fruits of years of pioneering research in what amounts to a new field in religious studies the study of how religious spiritual themes show up in the work of people concerned about nature in many diverse ways Taylor persuasively argues that appreciation of nature s sacred or spiritual dimension both informs and motivates the work of individuals ranging from radical environmentalists and surfers to eco tourism leaders and museum curators I highly recommend this book for everyone interested learning more about the surprising extent to which religious spiritual influences many of those who work to protect to exhibit or to represent the natural world Michael E Zimmerman Director Center for Humanities and the Arts University of Colorado at Boulder *Key Thinkers in Religion and Environment* Lucas F. Johnston, 2024-07-01 *Key Thinkers in Religion and Environment* provides a theoretical foundation for scholarship related to the intersection of religions natures and cultures across disciplines The text introduces students to the major

names theoretical issues and methodological orientations of the field while giving professors maximum freedom to insert case studies and examples as they wish Students will come away with an understanding of the most important scholars their theoretical contributions and the scholarly conundrums with which they wrestled The book includes figures who are foundational to the field of religious studies more broadly foregrounding key themes in their works which highlight the nature in of their argumentation whilst also highlighting the voices of women and people of color The thinkers come from a range of fields including religious studies philosophy anthropology sociology American Indian studies ethology agroecology theology and environmental history demonstrating the importance and impact of interdisciplinary research The book also offers a theoretical orientation which illuminates methodological and theoretical deficits in religious studies more generally whilst opening new avenues for thinking about environmental ethics It is a must read for all students and researchers of religion and the environment
