 Dewan, 2021-11-01 An unexpected story of climate change initiatives that threaten a complex waterscape Perilously close to
 sea level and vulnerable to floods erosion and cyclones Bangladesh is one of the top recipients of development aid earmarked
 for climate change adaptation Yet to what extent do adaptation projects address local needs and concerns Combining
 environmental history and ethnographic fieldwork with development professionals rural farmers and landless women
 Misreading the Bengal Delta critiques development narratives of Bangladesh as a climate change victim It examines how
 development actors repackage colonial era modernizing projects which have caused severe environmental effects as climate
 adaptation solutions Seawalls meant to mitigate against cyclones and rising sea levels instead silt up waterways and induce
 drainage related flooding Other adaptation projects from saline aquaculture to high yield agriculture threaten soil fertility
 biodiversity and livelihoods Bangladesh's environmental crisis goes beyond climate change extending to coastal
 vulnerabilities that are entwined with underemployment debt and the lack of universal healthcare This timely book analyzes
 how development actors create flawed causal narratives linking their interventions in the environment and society of the
 Global South to climate change Ultimately such misreadings risk exacerbating climatic threats and structural inequalities
