Sacred Natural Sites Bas Verschuuren,Jeffrey McNeely,Robert Wild,Gonzalo Oviedo,2012-06-25 This book illustrates that

sacred natural sites although often under threat exist within and outside formally recognised protected areas and heritage sites Sacred sites may well be some of the last strongholds for building resilient networks of connected landscapes as well as forming important nodes for maintaining a dynamic cultural fabric in the face of global change The book therefore bridges the gap between approaches to the conservation of cultural and biological diversity It applies a multidisciplinary approach to recognizing understanding and managing sacred natural sites It provides examples of how economic benefits such as from tourism and fisheries can be compatible goals with the conservation of sacred biodiversity and thus advancing the welfare of both people and wildlife It concludes that conservation efforts are likely to be successful only if the cultural and spiritual values are taken into account together with the socio economic interests of the custodian communities and other relevant stakeholders from books google ocm hk

Sacred Darkness Holley Moyes,2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves

Relating to Rock Art in the Contemporary World Liam M. Brady, Paul S.C. Taçon, 2016-12-01 Rock art has long been considered an archaeological artifact reflecting activities from the past yet it is also a phenomenon with present day meaning and relevance to both indigenous and non indigenous communities *Relating to Rock Art in the Contemporary World*

challenges traditional ways of thinking about this highly recognizable form of visual heritage and provides insight into its contemporary significance. One of the most visually striking forms of material culture embedded in landscapes, rock art is ascribed different meanings by diverse groups of people including indigenous peoples, governments, tourism offices, and the general public, all of whom relate to images and sites in unique ways. In this volume, leading scholars from around the globe shift the discourse from a primarily archaeological basis to one that examines the myriad ways that symbolism, meaning, and significance in rock art are being renegotiated in various geographical and cultural settings from Australia to the British Isles. They also consider how people manage the complex meanings, emotions, and cultural and political practices tied to rock art sites and how these factors impact processes relating to identity construction and reaffirmation today. Richly illustrated and geographically diverse, *Relating to Rock Art in the Contemporary World* connects archaeology, anthropology, and heritage studies. The book will appeal to students and scholars of archaeology, anthropology, heritage, heritage management, identity studies, art history, indigenous studies, and visual theory, as well as professionals and amateurs who have vested or avocational interests in rock art. Weaving together studies of archaeological remains, architecture, iconography, inscriptions, and Buddhist texts, the book offers a comprehensive survey of Indian Buddhism from the 6th century BCE to its eventual decline, examining in particular the difficulty of practicing individual asceticism while maintaining a coherent community of Buddhists. **The Heritage Corridor** Denis Byrne, 2021-10-14. The Heritage Corridor argues for a transnational approach to investigating and recording heritage places that emerge from histories of migration. Addressing the material legacy of migration, this book also relates it to issues of contemporary importance. Presenting an image of the built environment of migration as one shaped by the ongoing flows of people, ideas, objects, and money that circulate through migration corridors, Byrne proposes that houses and other structures built by migrants in their home villages in China over the period 1840-1940 should be seen as crystallisations of the labour, aspirations, and longings enacted and experienced by their builders while overseas. Demonstrating that the material world of the migrant is distributed across transnational space, the book calls for an approach to the heritage of migration that is similarly expansive. It proposes and illustrates new methods and strategies for heritage practice. *The Heritage Corridor* is a book for scholars and students in the fields of critical heritage studies, migration studies, and Chinese diasporic mobilities. It is designed to be accessible to heritage practitioners, readers with an interest in the material worlds of migration past and present, and to all those with an interest in the archaeology of transnational migration. *Asian Perspectives*, 2001. [Monastery, Monument, Museum](#) Maurizio Peleggi, 2017-10-31.

Ranging across the longue dur e of Thailand s history Monastery Monument Museum is an eminently readable and original contribution to the study of the kingdom s art and culture Eschewing issues of dating style and iconography historian Maurizio Peleggi addresses distinct types of artifacts and artworks as both the products and vehicles of cultural memory From the temples of Chiangmai to the Emerald Buddha from the National Museum of Bangkok to the prehistoric culture of Northeast Thailand and from the civic monuments of the 1930s to the political artworks of the late twentieth century even well known artworks and monuments reveal new meanings when approached from this perspective Part I Sacred Geographies focuses on the premodern era when religious credence informed the cultural alteration of landscape and devotional sites and artifacts including visual representation of the Buddhist cosmology were created Part II Antiquities Museums and National History covers the 1830s through the 1970s when antiquarianism and eventually archaeology emerged and developed in the kingdom partly the result of a shift in the elites worldview and partly a response to colonial and neocolonial projects of knowledge Part III Discordant Mnemoscapes deals with civic monuments and artworks that anchor memory of twentieth century political events and provide stages for both their commemoration and counter commemoration by evoking the country s embattled political present Monastery Monument Museum shows us how cultural memory represents a kind of palimpsest the result of multiple inscriptions reworkings and manipulations over time The book will be a rewarding read for historians art historians anthropologists and Buddhism scholars working on Thailand and Southeast Asia generally as well as for academic and general readers with an interest in memory and material culture
