John Romer

Sacred Signs Hieroglyphs In Ancient Egypt:

Sacred Signs Penelope Wilson, 2003 The hieroglyphs of ancient Egypt have fascinated people for over three thousand years In this engaging new study Penelope Wilson offers a wide ranging look at this ancient form of writing touching on everything from basic principles of translation to its broader function in Egyptian culture Sacred Signs illuminates the cultural significance of hieroglyphs showing how it was used in monumental art and as the rarified language of the gods Wilson points out that the Egyptian word for pictorial writing was *medu netjer* which means words of god Hieroglyphs were an exalted mode of communication used to speak with the gods or to guide rulers in the afterlife for instance hieroglyphs might describe a set of spells rituals and the route to the afterlife for use by the king or queen Indeed hieroglyphs differed from everyday writing and the average Egyptian was unable to read them only the elite were taught the pictorial signs Throughout the book Wilson illuminates the writing system itself We learn that hieroglyphs can be read either left to right or right to left and that animals birds people serpents and fish were drawn in profile all facing the same way so that readers would know which way to read the line Also individual signs derived from everyday objects in the Egyptian world show that learning hieroglyphs is not only a linguistic exercise but also an insightful introduction to Egyptian culture and daily life Written by an authority on hieroglyphics Sacred Signs is the only book available that presents up to date evidence in an accessible way illuminating the function and importance of hieroglyphs within the framework of ancient Egyptian culture

A fully illustrated panoramic world history of art from ancient civilisation to the present day exploring the remarkable endurance of humankind's creative impulse Fifty thousand years ago on an island in Indonesia an early human used red ochre pigment to capture the likeness of a pig on a limestone cave wall Around the same time in Europe another human retrieved a lump of charcoal from a fire and sketched four galloping horses It was like a light turning on in the human mind Our instinct to produce images in response to nature allowed the earliest Homo sapiens to understand the world around them and to thrive Now art historian John Paul Stonard has travelled across continents to take us on a panoramic journey through the history of art from ancient Anatolian standing stones to a Qing Dynasty ink handscroll from a

How We Got Here C. R. Hallpike, 2008-11-06 Only 10 000 years ago our ancestors were small groups of hunter gatherers with bows and arrows and stone tools Today we live in vast nations with all the power of modern science and industry and the ability to send men to the Moon and to destroy all life on the planet In the history of the world 10 000 years is the blink of an eye yet it has seen the total transformation of human existence That extraordinary revolution is just as interesting as the Big Bang or the origin of life and this book is a clear and concise explanation of how it happened Human culture was something completely new in the history of the world and has evolved in a unique way Darwin's theory of evolution can tell us nothing at all about this very strange process that went far beyond any mundane struggle for physical survival by naked apes The picture of Stonehenge built with enormous labour for no material reward illustrates one of the central themes of this book the fundamental importance of the human imagination to the development of science that made possible the modern mastery of nature
