Gillette, Thomas L. more and more of our physical landscape is being altered worldwide through rapid growth and development the cultural landscape is also being changed and challenged These changes often reflect the interests of some members of society while the interests of others including those of Native and Indigenous communities and many archaeologists environmentalists and others who understand the importance of knowing the past are disregarded The latter group is dedicated toward preserving special places and continuing to provide for Native people the ability to celebrate their traditions and focusing on defining the sacred landscape
