Springer, Robert Steinberg, 2006-11-14      **Seminar on Algebraic Groups and Related Finite Groups** Armand Borel, R. W. Carter, Charles Curtis, 2014-09-01      **Automorphisms of Fusion Systems of Finite Simple Groups of Lie Type** Carles Broto, Jesper M. Møller, Bob Oliver, 2020-02-13 For a finite group  $G$  of Lie type and a prime  $p$  the authors compare the automorphism groups of the fusion and linking systems of  $G$  at  $p$  with the automorphism group of  $G$  itself When  $p$  is the defining characteristic of  $G$  they are all isomorphic with a very short list of exceptions When  $p$  is different from the defining characteristic the situation is much more complex but can always be reduced to a case where the natural map from  $\text{Out } G$  to outer automorphisms of the fusion or linking system is split surjective This work is motivated in part by questions involving extending the local structure of a group by a group of automorphisms and in part by wanting to describe self homotopy equivalences of  $BG_p$  in terms of  $\text{Out } G$       **Lie Groups and Lie Algebras: E. **Encyclopaedia of Mathematics** M. Hazewinkel, 2013-12-01      **Encyclopaedia of Mathematics** Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977-1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question

They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques The Cumulative Book Index ,1999 Mathematisches Institut Georg-August-Universität Göttingen, Seminars Summer 2003/2004 Yuri Tschinkel,2004 This volume contains lecture notes from the seminars alpha Number Theory alpha Algebraic Geometry and alpha Geometric methods in representation theory which took place at the Mathematics Institute of the University of Göttingen during the Winter Term 2003/2004 Most contributions report on recent work by the authors **Group Theory, Combinatorics, and Computing** Robert Fitzgerald Morse, Daniela Nikolova-Popova, Sarah Witherspoon,2014-02-13 This volume contains the proceedings of the International Conference on Group Theory Combinatorics and Computing held from October 3-8 2012 in Boca Raton Florida The papers cover a number of areas in group theory and combinatorics Topics include finite simple groups groups acting on structured sets varieties of algebras classification of groups generated by 3 state automata over a 2 letter alphabet new methods for construction of codes and designs groups with constraints on the derived subgroups of its subgroups graphs related to conjugacy classes in groups and lexicographical configurations Application of computer algebra programs is incorporated in several of the papers This volume includes expository articles on finite coverings of loops semigroups and groups and on the application of algebraic structures in the theory of communications This volume is a valuable resource for researchers and graduate students working in group theory and combinatorics The articles provide excellent examples of the interplay between the two areas Representation Theory of Algebraic Groups and Quantum Groups Akihiko Gyoja, Hiraku Nakajima, Ken-ichi Shinoda, Toshiaki Shoji, Toshiyuki Tanisaki,2010-11-25 Invited articles by top notch experts Focus is on topics in representation theory of algebraic groups and quantum groups Of interest to graduate students and researchers in representation theory group theory algebraic geometry quantum theory and math physics **Differential Algebra, Complex Analysis and Orthogonal Polynomials** Primitivo B. Corwin, I.M. Gelfand, J. Lepowsky,2012-12-06 This Seminar began in Moscow in November 1943 and has continued without interruption up to the present We are happy that with this volume Birkhäuser has begun to publish papers of talks from the Seminar It was unfortunately difficult to organize their publication before 1990 Since 1990 most of the talks have taken place at Rutgers University in New Brunswick New Jersey Parallel seminars were also held in Moscow and during July 1992 at IRES in Bures-sur-Yvette France Speakers were invited to submit papers in their own style and to elaborate on what they discussed in the Seminar We hope that readers will find the diversity of styles appealing and recognize that to some extent this reflects the diversity of styles in a mathematical society The principal aim was to have

interesting talks even if the topic was not especially popular at the time The papers listed in the Table of Contents reflect some of the rich variety of ideas presented in the Seminar Not all the speakers submitted papers Among the interesting talks that influenced the seminar in an important way let us mention for example that of R Langlands on percolation theory and those of J Conway and J McKay on sporadic groups In addition there were many extemporaneous talks as well as short discussions

**Deutsche Nationalbibliographie und Bibliographie des im Ausland erschienenen deutschsprachigen Schrifttums**, 1986      **Lie Groups and Symmetric Spaces** Semen Grigor'evich Gindikin, 2003 The book contains survey and research articles devoted mainly to geometry and harmonic analysis of symmetric spaces and to corresponding aspects of group representation theory The volume is dedicated to the memory of Russian mathematician F I Karpelevich 1927 2000 Of particular interest are the survey articles by Sawyer on the Abel transform on noncompact Riemannian symmetric spaces and by Anker and Ostellari on estimates for heat kernels on such spaces as well as the article by Bernstein and Gindikin on integral geometry for families of curves There are also many research papers on topics of current interest The book is suitable for graduate students and research mathematicians interested in harmonic analysis and representation theory
