ABSTRACT

There is a fine tradition of graphic designers making the transition from design practice to design education, and Bauhaus' Moholy-Nagy provides a good historic precedence for this. But within Higher Education there is now an expectation to also engage in 'academic research,' but surely that is what social scientist or humanities scholars do? After all, graphic designers understand praxis and tacit knowledge? As the discipline's educators, how do we develop the field of graphic design research "from anecdote to evidence" to develop the field of academic research. This paper suggests that a philosophical application of Pragmatism within our practice would be beneficial. Moholy-Nagy, back in 1950's Chicago embraced pragmatic methodologies in his New Bauhaus School. With Pragmatism's focus on knowledge and understanding being emergent, this paper will outline a practice-based, pragmatic methodological framework, which utilises C.S. Peirce's pragmatic form of semiotics - Semiosis. This paper will use visual examples to take the reader into this design research, which is both THROUGH and FOR design, to demonstrate one possible way to facilitate the improvement of our visual communication.

Introduction

Graphic designers define the knowledge behind their practice as tacit knowledge. This term tacit knowledge suggests that the work created by the designer comes from "a knowledge we cannot tell" (Polanyi, 2009, p5). Polanyi in his 1966 book *The Tacit Dimension* deduces that what we, as designers, call tacit knowledge is in itself defined by four aspects: the functional, the phenomenal, the semantic and the ontological (*ibid.*, p13). What we as designers define as tacit knowledge, is the act of designing the best design solution that works as a design solution. To do so we use design techniques and craft we have learnt from our design education, to create a design that 'works' because we have learnt that the techniques and craft of our design education can be successfully applied to any design problem. We can explain this as 'knowing what' (*wissen*) is to be done,
