International Migration Douglas S. Massey,J. Edward Taylor,2004-03-25 International Migration Prospects and Policies offers a comprehensive up to date survey of global patterns

of international migration and the policies employed to manage the flows It shows that international migration is not rooted in poverty or rapid population growth but in the expansion and consolidation of global markets As nations are structurally transformed by their incorporation into global markets people are displaced from traditional livelihoods and become international migrants In seeking to work abroad they do not necessarily move to the closest or richest destination but to places already connected to their countries of origin socially economically and politically When they move migrants rely heavily on social networks created by earlier waves of immigrants and in recent years professional migration brokers have become increasingly common Developing countries generally benefit from international migration because migrant savings and remittances provide foreign earnings to finance balance of payments deficits and make productive investments Some developing nations have gone so far as to establish programs or ministries dedicated to the export of workers Developed nations in contrast focus more on the social and economic costs of immigrants and seek to reduce their numbers regulate their characteristics and limit their access to social services Over time receiving nations have gravitated toward a similar set of restrictive policies yielding undocumented migration as a worldwide phenomenon Globalization also creates infrastructures of transportation communication and social networks to put developed societies within reach In the latter ageing populations and segmenting markets create a persistent demand for immigrant workers All these trends are likely to intensify in the coming years to make immigration policy a key political issue in the twenty first century

Globalistics and Globalization Studies: Theories, Research & Teaching Leonid Grinin, Ilya Ilyin, Andrey

Korotayev, 2013-09-30 This is the second issue of the new series titled Globalistics and Globalization Studies Globalistics may be regarded as a sort of systemic and more or less integrated core within Global Studies At present Global Studies function in two main dimensions in the research of global political economic cultural and social processes on the one hand and in the realm of teaching manifesting themselves in the creation of various Global Studies programs and courses for university students who learn to see the world in its entirety and variety The second dimension is immensely important as the contents of such programs and courses may determine how the world will be comprehended by those people who may decide its fate in a decade or two This dualistic nature of Global Studies has determined the general direction of our anthology that comprises both the theoretical dimension of Global Studies and their application to the teaching process The anthology consists of three parts presenting a wide range of views on the meaning of the contemporary epoch the past and the future of

some important global processes as well as the problems and successes in the teaching process of Global Studies Part 1 Globalization in Historical Retrospective Part 2 Globalistics Global Studies and Global Processes Part 3 Teaching Global Studies In the present anthology one can find perceptions of globalization by a number of famous scholars from different countries of the world Ervin Laszlo Christopher Chase Dunn and others but one can also get to know rather peculiar visions of globalization by Russian scientists and educators *International Migration in Asia Trends and Policies* OECD,2002-02-01 This publication presents the current migration policy debates in Asia which are largely influenced by recent macroeconomic and labour market developments in the region *Marginal Workers* Ruben J. Garcia,2013-09-13 Undocumented and authorized immigrant laborers female workers workers of color guest workers and unionized workers together compose an enormous and diverse part of the labor force in America Labor and employment laws are supposed to protect employees from various workplace threats such as poor wages bad working conditions and unfair dismissal Yet as members of individual groups with minority status the rights of many of these individuals are often dictated by other types of law such as constitutional and immigration laws Worse still the groups who fall into these cracks in the legal system often do not have the political power necessary to change the laws for better protection In *Marginal Workers* Ruben J Garcia demonstrates that when it comes to these marginal workers the sum of the law is less than its parts and despite what appears to be a plethora of applicable statutes marginal workers are frequently lacking in protection To ameliorate the status of marginal workers he argues for a new paradigm in worker protection one based on human freedom and rights Merchants of Labour International Labour Office,International Institute for Labour Studies,2006 More workers are crossing national borders to look for jobs than ever before Many migrants seek overseas employment with the help of agents or intermediaries These merchants of labour include relatives who finance a migrant's trip provide housing and arrange for a job abroad public employment services and private recruitment agencies They also comprise an insalubrious underworld of smugglers and traffickers The agents who recruit and deploy migrant workers are at the heart of the evolving migration infrastructure i.e. the network of business and personal ties that is creating a global labour market This book highlights best practices in the activities and regulation of these merchants of labour as well as innovative strategies to protect migrant workers underlining the contribution of ILO standards It covers a broad range of national and regional experiences and puts merchants of labour in the wider context of changing employment relationships in globalizing labour markets The papers it contains are an important contribution to understanding a major mechanism facilitating the growth of the migrant labour force *Handbook on Establishing Effective Labour Migration Policies in Countries of Origin and Destination* Nilim Baruah,Ryszard Ignacy Cholewinski,International Organization for Migration,2006 Aims to assist states in their efforts to develop new policy approaches solutions and practical measures for better management of labour migration in countries of origin and of destination Analyses effective policies and practices and draws on examples from OSCE participating States as
