The Senses of Modernism Sara Danius, 2019-01-24 In The Senses of Modernism Sara Danius develops a radically new theoretical and historical understanding of high modernism The author closely analyzes Thomas Mann s The Magic Mountain Marcel Proust s Remembrance of Things Past and James Joyce s Ulysses as narratives of the sweeping changes that affected high and low culture in the age of technological reproduction In her discussion of the years from 1880 to 1930 Danius

proposes that the high modernist aesthetic is inseparable from a technologically mediated crisis of the senses She reveals the ways in which categories of perceiving and knowing are realigned when technological devices are capable of reproducing sense data Sparked by innovations such as chronophotography phonography radiography cinematography and technologies of speed this sudden shift in perceptual abilities had an effect on all arts of the time Danius explores how perception notably sight and hearing is staged in the three most significant modern novels in German French and British literature The Senses of Modernism connects technological change and formal innovation to transform the study of modernist aesthetics Danius questions the longstanding acceptance of a binary relationship between high and low culture and describes the complicated relationship between modernism and technology challenging the conceptual divide between a technological culture and a more properly aesthetic one What Goes On in My Head? Robert Winston,2010-09-20 What Goes On In My Head will introduce readers to the most powerful and complicated computer network they will ever encounter their own brain It explains what the different parts of the brain do how they work together and how scientists look at the brain What Goes On In My Head also explains how the brain changes at different stages in a person s life how you learn to do things what gives us our individual personalities what memory is and how illness affects the brain Learn about why we had moods and emotions why sleep is important and much much more What Goes On In My Head is packed with tips and brain teasers that will test memory perception reasoning and reactions Find out what really does go on in your brain **You're Sensational** ,1999

Law and Literature: A Still-thriving Relationship Pedro Talavera,2025-04-17 What kind of relationship exists between law and literature Why have so many great jurists and philosophers used literature to explore their own disciplines What were they looking for and what did they find What can law learn from literature and how does literature reflect legal praxis This book takes us on a fascinating journey through those questions and their answers The first part offers a diachronic and thematic overview of the law and literature movement showing how literature has influenced new ways of thinking about law from a narrative hermeneutic humanistic ethical and critical perspective The second part analyzes the value of literature in the education of students lawyers and judges And the third section presents a captivating analysis of the literary notion of justice and the relationship between literature and the economic analysis of law **Insatiable Appetites** Kelly L Watson,2015-04-24 Compelling By focusing on cannibalism sex and gender presents the relationship between discourse and power in the unfolding of empire Carole Blackburn The University of British Columbia Cannibalism for medieval and early modern Europeans was synonymous with savagery Humans who ate other humans they believed were little better than animals The European colonizers who encountered Native Americans described them as cannibals as a matter of course and they wrote extensively about the lurid cannibal rituals they claim to have witnessed In this definitive analysis Kelly L Watson argues that the rumors of cannibalism surrounding Native Americans served a practical purpose European colonizers had to forge new identities in the Americas and find ways to not only subdue but also co exist with

native peoples In her close read of letters travel accounts artistic renderings and other descriptions of cannibalism Watson focuses on how gender race and imperial power intersect within the figure of the cannibal Watson reads cannibalism as a part of a dominant European binary in which civilization is rendered as male and savagery is seen as female and she argues that as Europeans came to dominate the New World they continually rewrote the cannibal narrative to allow for a story in which the savage effeminate cannibalistic natives were overwhelmed by the force of virile European masculinity Original and historically grounded *Insatiable Appetites* uncovers the ways in which difference is understood in the West An engaging comparative study of how a long standing trope became a mainstay of European imperial thought *Journal of Interdisciplinary History* This fine book follows untraveled paths combining fascinating discoveries in new primary sources with refreshing interpretations *Journal of American History* Insightful Choice **From Milk to Mastery** Barrett

Introducing the latest edition of *The Phenomenon of Pain* A Comprehensive Exploration of Pain Mechanisms and Therapeutic Approaches In recent decades pain has emerged as a focal point in both basic and clinical research reflecting its profound impact on individuals lives The rapid advancement of knowledge has deepened our understanding of the complex neurophysiological and psychological mechanisms underlying pain shedding light on its multifaceted nature Clinicians grapple daily with the daunting reality of human suffering navigating its intricate web of causes and manifestations This continuous engagement with pain presents significant and stressful challenges from the relentless pursuit of understanding and alleviating it This book transcends mere discourse on the physiological and psychological underpinnings of pain it delves into the intricate factors contributing to its persistence Furthermore it meticulously examines pharmacological and nonpharmacological treatment modalities forging a crucial link between the mechanisms of pain and therapeutic interventions By bridging the gap between pain mechanisms and treatment strategies this edition equips clinicians with invaluable insights to augment their clinical acumen Armed with this knowledge clinicians can tailor interventions to effectively address the diverse array of pain presentations encountered in their practice *Creating Identity in the Victorian Fictional Autobiography* Heidi L. Pennington,2018-04-30 This is the first book length study of the fictional autobiography a subgenre that is at once widely recognizable and rarely examined as a literary form with its own history and dynamics of interpretation Heidi L Pennington shows that the narrative form and genre expectations associated with the fictional autobiography in the Victorian period engages readers in a sustained meditation on the fictional processes that construct selfhood both in and beyond the text Through close readings of *Jane Eyre* *David Copperfield* and other well known examples of the subgenre Pennington shows how the Victorian fictional autobiography subtly but persistently illustrates that all identities are fictions Despite the subgenre s radical implications regarding the nature of personal identity fictional autobiographies were popular in their own time and continue to inspire devotion in readers This study sheds new light on what makes this subgenre so compelling up to and including in the present historical moment of precipitous social and technological change As we continue to grapple with the existential question of what determines who we really are this book explores the risks and rewards of embracing conscious acts of fictional self production in an unstable world *Theatre Culture in America, 1825-1860* Rosemarie K. Bank,1997-01-28 A study of pre Civil War American theatre *Body Maps* Lan A. Li,2025-04-15 A historical and cultural study of how representing invisible anatomical structures has reshaped our understanding of human anatomy In *Body Maps* Lan A Li unveils a rich history of the hidden landscapes of the human body This compelling study explores the world of invisible anatomy explaining how hand drawn body maps have shaped our understanding of the human form across cultures and centuries From the meridian charts in East Asian medicine to

neurophysiological illustrations *Body Maps* traces the evolution of anatomical representation from the tenth to the twentieth centuries Drawing on case studies across time and place from Kaifeng to Dejima and from Beijing to Berlin Li expertly navigates the complex interplay between Eastern and Western medical traditions At the heart of this history remains a perennial mystery How did representations of jingluo meridians become intertwined with and sometimes subsumed by concepts of nervous anatomy By examining the graphic history of these invisible structures *Body Maps* challenges our assumptions about the stability of medical knowledge and invites us to reconsider the nature of anatomical reality Each chapter opens with a single image and explores how practitioners negotiated between materiality and metaphor with the nature of the body and the symbols used to represent it *Body Maps* is a thought provoking exploration of how images shape our understanding of the world By bringing together insights from the history of science postcolonial studies art history Chinese studies critical cartography and medical anthropology Li offers a fresh perspective on the cultures of objectivity that have defined our approach to the human body
