The Advocate ,1996-06-11 The Advocate is a lesbian gay bisexual transgender LGBT monthly newsmagazine Established in 1967 it is the oldest continuing LGBT publication in the United States **Science, Scripture, and Homosexuality** Alice Ogden Bellis,Terry L. Hufford,2011-01-01 The collaborative work of a biblical scholar and a biology professor Science Scripture and Homosexuality addresses scripture passages relating to homosexuality and explains the foundation of genetics and the growing evidence suggesting an organic basis for sexual orientation The authors argue that the role of the homosexual as well as the heterosexual within the Church should be based upon common criteria for all Written in a highly accessible manner the book is ideal for congregational discussion *The Sound of Bells* Norah Moore,2013 This book brings together the teachings of Meher Baba and the teachings of Carl Gustav Jung for the first time Many people would wish to bring together their inner experience of spirituality and psychological development Meher Baba did not come to bring a new religion but a philosophy that brought all religions together In this first book *The Sound of Bells and Eastern Mysticism* I looked at C G Jung s Analytical Psychology in the light of Meher Baba s book *God Speaks* In the second book of the trilogy *Glowing Embers for the New Humanity* God can only be Lived I brought a more detailed account of how this might be accomplished In the final book of the trilogy I turned to a more personal account of how I followed this path myself and summed up how the path has been followed throughout all the avataric ages **Do Ask, Do Tell** Bill Boushka,2000 The original Bill of Rights sponsored largely by James Madison is now about 210 years old Reinforced by the Fourteenth Amendment which eventually applied many of its provisions to the states it has served us well It is time to re evaluate our fundamental constitutional rights and to seriously consider their major renovation This is my central proposal Are we ready to trust ourselves as individuals with the personal responsibilities that go with rights When government defines personal moral values we tend to take less account for not only our own actions but also our own underlying values for those spiritual yearnings that make us all unique people who we are We tend to lose interest in speaking for ourselves and tend to leave moral judgments to experts who get paid to pass judgment on all of us I discuss a philosophy often called libertarianism of extremely restricted government I present it from the personal perspective of a gay man who grew up in a period of enormous change and migration toward cultural individualism My argument is intended for everyone but I provide my own detailed perspectives on many issues The parallel between draft deferments during the Vietnam era and the gays in the military battle today How close the gay community as we know it came to total catastrophe during the early days of AIDS crisis What the family values debate is really all about Volunteerism and social obligations and how both military service and parenting fit into these What discrimination is really all about How the Don t Tell mentality interferes with political and social debate in many areas Why equal rights for gays is important for everybody A science of personal growth and why libertarianism is good for personal growth *At the End of Time* Robin Robertson,2011-05-01 Many cycles predicting the

end of times fill our modern dialog from the coming of the Millennium to 2012 Robin Robertson helps to clarify these prophecies and offers insight into the central issues of our challenges and the experience and their life changing implications For eighteen hundred years the prophecies in the Book of Revelation have captured the collective Western imagination Saint John s rich imagery and the dramatic urgency of the looming disasters he predicts have both fascinated and frightened us with its apparent message that the end of time is near Robin Robertson Ph D deciphers the mystical theology and visions of the prophets seers and shamans His analysis incorporates the insights of modern mathematics and Chaos Theory as well as his personal insights gained through his work as a Jungian therapist and teacher Robertson holds a mirror to humanity s need to know Self and God He explains that Saint John s vision foretells the massive change in consciousness that is happening in our time

[In Search of Florentine Civic Humanism, Volume 2](#) Hans Baron, 2019-04-23 Hans Baron s Crisis of the Early Italian Renaissance is widely considered one of the most important works in Italian Renaissance studies Princeton University Press published this seminal book in 1955 Now the Press makes available a two volume collection of eighteen of Professor Baron s essays most of them thoroughly revised unpublished or presented in English for the first time Spanning the larger part of his career they provide a continuation of and complement to the earlier book The essays demonstrate that contemporaneously with the revolution in art modern humanistic thought developed in the city state climate of early Renaissance Florence to a far greater extent than has generally been assumed The publication of these volumes is a major scholarly event a reinforcement and amplification of the author s conception of civic Humanism This book includes studies of medieval antecedents and special studies of Patrch Leonardo Bruni and Leon Battista Alberti It offers a thoroughly re conceived profile of Machiavelli drawn against the background of civic Humanism as well as essays presenting evidence that French and English Humanism of the sixteenth

and seventeenth centuries was closely tied to Italian civic thought of the fifteenth century. The work culminates in a reassessment of Jacob Burckhardt's pioneering thought of the Renaissance. Hans Baron is Distinguished Research Fellow Emeritus, Newberry Library. Originally published in 1988, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Evolution and Social Progress Joseph H. H. Husslein, 1920 *Francophone Post-colonial Cultures* Kamal Salhi, 2003-01-01 A collection of discussions of literary texts from areas as diverse as Europe and North Africa, the Caribbean and South Asia, regions of the world that seem to have only their language in common. But despite enormous differences among all the countries where French is spoken, Francophone literatures tend to deal with a similar spread of issues. This volume positions the study of the Francophone world and its cultures as a comparative project in which post-colonial Francophone cultures and the specific alterity of these cultures emerge as inextricable from and essential to an understanding of modern France. The volume is organized by region with an international roster of contributions and includes summaries of selected creative and critical works and a guide to selected terms and figures.

Searching for the Secrets of Nature Simon Varey, Rafael Chabrán, 2000 This collection of essays by historians of science and medicine and literary and textual scholars from several countries analyzes the achievements of Dr. Francisco Hernández (1515-1587), author of the monumental *The Natural History of New Spain* in the history of medicine and science in Europe and the Americas.

Take Back the Word - A Queer Reading of the Bible Robert E. Goss, Mona West, 2000-11-15 Perhaps the most revolutionary contribution of *Take Back the Word* is its presentation of resistant practices of reading the Bible that challenge oppressive applications of Scripture to clobber queer folk. If lesbians, gay men, bisexuals, transgender, non-gender conforming, and questioning people are to take back the word of Scripture for themselves, they must take it back in a new way. Essays examine queer strategies for reading queer ethical models from the Hebrew Scriptures and queer good news stories from the Christian Scriptures.

The Art of Building at the Dawn of Human Civilization Marta Tobolczyk, 2020-09-18 This book offers a new unconventional outlook on architecture, presenting some aspects of its evolution. It demonstrates how prehistoric people developed the art of building when trying to solve increasingly complicated spatial and structural problems. The book shows the activity of building to be in synergy with the parallel advancement of the human ability to think in symbolic and abstract terms. The anthropological approach of this book will allow scientists to formulate the general principles and regularities of the development of architecture within a new field of studies named the Ontogenesis of Architecture.

Murphy,2012-10-05 A critical review of the debate over the still hypothetical possibility of prenatal intervention by parents to select the sexual orientation of their children Parents routinely

turn to prenatal testing to screen for genetic or chromosomal disorders or to learn their child's sex. What if they could use similar prenatal interventions to learn or change their child's sexual orientation? Bioethicists have debated the moral implications of this still hypothetical possibility for several decades. Some commentators fear that any scientific efforts to understand the origins of homosexuality could mean the end of gay and lesbian people if parents shy away from having homosexual children. Others defend parents' rights to choose the traits of their children in general and see no reason to treat sexual orientation differently. In this book, Timothy Murphy traces the controversy over prenatal selection of sexual orientation, offering a critical review of the literature and presenting his own argument in favor of parents' reproductive liberty. Arguing against commentators who want to restrict the scientific study of sexual orientation or technologies that emerge from that study, Murphy proposes a defense of parents' right to choose. This, he argues, is the only view that helps protect children from hurtful family environments that is consistent with the increasing powers of prenatal interventions and that respects human futures as something other than accidents of the genetic lottery.
