Servants Of Post Industrial Power:

The Human Motor Anson Rabinbach, 1992-01-08 Masterfully integrating Europe wide debates in science philosophy technology economics and social policy Rabinbach has provided us with a profoundly original understanding of the productivist obsessions from which we are still painfully freeing ourselves A splendid example of the mutual enrichment of intellectual and social history It goes well beyond its central concern with the science of work to illuminate everything it discusses from Marxism to the social uses of photography from cultural decadence to the impact of the First World War Martin Jay University of California Berkeley **Directory of European political scientists** European Consortium for Political Research, University of Essex. Compiled and ed. by the Central Services of the ECPR, 2016-11-07 No detailed description available for Directory of European political scientists **The Global Evolution of Industrial Relations** Bruce E. Kaufman, 2006 Worlds of Work Daniel B. Cornfield, Randy Hodson, 2012-12-06 The advent of transnational economic production and market integration compels sociologists of work to look beyond traditional national boundaries and build an international sociology of work in order to effectively address the human scientific and practical challenges posed by global economic transnationalism The purpose of this volume is to promote transnational dialogue about the sociology of work and help build a truly international discipline in this field **The Eclipse of the Utopias of Labor** Anson Rabinbach, 2018-02-06 The Eclipse of the Utopias of Labor traces the shift from the eighteenth century concept of man as machine to the late twentieth century notion of digital organisms Step by step from Jacques de Vaucanson and his Digesting Duck through Karl Marx's Capital Hermann von Helmholtz's social thermodynamics Albert Speer's Beauty of Labor program in Nazi Germany and on to the post Fordist workplace Rabinbach shows how society the body and labor utopias dreamt up future societies and worked to bring them about This masterful follow up to *The Human Motor* Rabinbach's brilliant study of the European science of work bridges intellectual history labor history and the history of the body It shows the intellectual and policy reasons as to how a utopia of the body as motor won wide acceptance and moved beyond the man as machine model before tracing its steep decline after 1945 and along with it the eclipse of the great hopes that a more efficient workplace could provide the basis of a new more socially satisfactory society Industrial Relations Michael Poole, 2013-10-11 This comparative study of industrial relations provides an analysis of a wide range of phenomena with a view to uncovering the origins of national diversity It takes into account the notion of strategic choice set within a series of constraints of environment organizational and institutional conditions and power relationships The book Covers a wide range of examples from the UK USA France Germany Italy Sweden Eastern Europe Latin America India and Japan Includes a comprehensive analysis of management and employers associations labour and trades unions Examines the role of the state in comparative perspective **A Dictionary of Sociology** John Scott, 2014 Coverage is extensive and includes terms from the related fields of psychology economics anthropology philosophy and political science Provided by publisher **The Militant Worker**

Scott Lash, 1984 This is a consummately polemical yet ultimately plausible endeavor to recast our theoretical empirical and historical understanding of social class The author demonstrates that neither technology nor skill nor wage level is the prime determinant of militancy Instead it is ideological and organizational forms *Postmodernism: A Bibliography, 1926-1994*

Popular Culture in Modern France Brian Rigby, 2003-09-02 Culture is one of the most frequently used terms in the French vocabulary It sells not only books newspapers and magazines but also consumer products and political parties But what are the meanings of culture populaire What have the French understood by it and what is its history Brian Rigby's lively and cogent study traces changing notions of popular culture in France from 1936 the year of the Popular Front to the present day Asking why culture has become such a fiercely contested term Rigby considers the work of the major French theorists including Barthes Bourdieu and Baudrillard *The European Productivity Agency and Transatlantic Relations, 1953-1961*

Bent Boel, 2003 The European Productivity Agency EPA was initially designed as a means to Americanize Western Europe through the transfer of American techniques know how and ideas to the Old Continent It increasingly became a framework within which the member countries sought European solutions to their problems This study of the EPA sheds new light on the nature of European cooperation and transatlantic relations in the

Crisis in the French Labour Movement W.Rand Smith,1987-06-18 The Imaginary Revolution Michael M. Seidman,2004-08 The events of 1968 have been seen as a decisive turning point in the Western world The author takes a critical look at May 1968 and questions whether the events were in fact as revolutionary as French and foreign commentators have indicated He concludes the student movement changed little that had not already been challenged and altered in the late fifties and early sixties The workers strikes led to fewer working hours and higher wages but these reforms reflected the secular demands of the French labor movement May 1968 was remarkable not because of the actual transformations it wrought but rather by virtue of the revolutionary power that much of the media and most scholars have attributed to it and which turned it into a symbol of a youthful renewed and freer society in France and beyond

Science and Technology in a Developing World T. Shinn,J. Spaapen,V.V. Krishna,2013-04-17 block possible Soviet expansion by mobilizing European democracies the policy soon extended to some developing countries in Asia and Latin America In response the USSR gradually initiated development programs for newly independent nations in Asia and Africa In this context super power rivalry operated in the South to i expand spheres of influence and control ii guard Southern nations from the influence and incursions launched by the opposed camp iii stimulate indigenous development With few exceptions Southern nations provided little input to the definition and execution of North South dynamics during this period In the case of Africa and to some extent Asia the acquisition of independence was so recent and often sudden that there was little time to reflect on the kind of policies and measures needed to build balanced relations with the former mother country In Latin America the Monroe Doctrine had long insured that the region was a virtual captive of the US Aid for development was contingent on conformity to US political and economic interests The cognitive component of South North dealings strongly reflected the two above mentioned dispositions The relative lack of political experience in the South and the dearth of an organized and sizable intellectual academic community meant that there were few cognitive and human resources for undertaking careful study and analysis of the conditions and needs of development from a Southern perspective influential exceptions existed though such as Raul Prebisch in Latin America or Ghandi in India
