Zooland Irus Braverman, 2012-11-28 This book takes a unique stance on a controversial topic zoos Zoos have their ardent supporters and their vocal detractors And while we all have opinions on what zoos do few people consider how they do it Irus Braverman draws on more than seventy interviews conducted with zoo managers and administrators as well as animal activists to offer a glimpse into the otherwise unknown complexities of zooland Zooland begins and ends with the story of Timmy the oldest male gorilla in North America to illustrate the dramatic transformations of zoos since the 1970s Over these decades modern zoos have transformed themselves from places created largely for entertainment to globally connected institutions that emphasize care through conservation and education Zoos naturalize their spaces classify their animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman **Entangled Encounters at the National Zoo** Daniel Vandersommers, 2023-09-29

Founded amid the urban commotion of Washington DC before the dawn of the twentieth century the National Zoological Park opened to preserve teach and conduct research about the animal world Entangled Encounters at the National Zoo is a study of this important cultural landmark from 1887 to 1920 Centered on the animals themselves each chapter looks from a different angle at the influential science of popular zoology in order to shed new light on the complex entangled relationships between humans and animals Daniel Vandersommers's goal is twofold First through narrative he shows how zoo animals always ran away from the zoo This is meant literally animals escaped frequently but even more so figuratively Living breathing historical zoo animals ran away from their cultural constructions and these constructions ran away from the living bodies they were made to represent The author shows that the resulting gaps produced by runaway animals contain concealed distorted and erased histories worthy of uncovering Second Entangled Encounters at the National Zoo demonstrates how the popular zoology fostered by the National Zoo shaped every aspect of American science culture and

conservation during the Gilded Age and Progressive Era Between the 1880s and World War I as intellectuals debated Darwinism and scientists institutionalized the laboratory zoological parks suddenly appeared at the heart of nearly every major American city captivating tens of millions of visitors Vandersommers follows stories previously hidden within the National Zoo in order to help us reconsider the place of zoos and their inhabitants in the twenty first century **Look Who's There! and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work *Zoo Studies* will change the way readers see nonhuman animals and themselves
