Louis and Bebe Barron's Forbidden Planet James Wierzbicki,2005-06-30 James Wierzbicki's book on the score for *Forbidden Planet* deals with the composers backgrounds the composers studio techniques the critical context of 1950's American science fiction films and a summary of critical readings of *Forbidden Planet* an analysis of the decontextualized music as presented on the 1977 original soundtrack album and a cue by cue analysis of the Barrons music as it is actually used in the film With numerous transcriptions and graphs to illustrate various aspects of musical structure this study blazes a much needed trail in the study of electronic music

Revolutions in American Music Michael Broyles,2024-02-20 The story of how unexpected connections between music technology and race across three tumultuous decades changed American culture How did a European social dance craze become part of an American presidential election Why did the recording industry become racially divided Where did rock n roll really come from And how do all these things continue to reverberate in today's world In *Revolutions in American Music* award winning author Michael Broyles shows the surprising ways in which three key decades the 1840s the 1920s and the 1950s shaped America's musical future Drawing connections between new styles of music like the minstrel show jazz and rock n roll and emerging technologies like the locomotive the first music recordings and the transistor radio Broyles argues that these decades fundamentally remade our cultural landscape in enduring ways At the same time these connections revealed racial fault lines running through the business of music in an echo of American society as a whole Through the music of each decade we come to see anew the social cultural and political fabric of the time Broyles combines broad historical perspective with an eye for the telling detail and presents a variety of characters to serve as focal points including the original Jim Crow a colorful Hungarian dancing master named Gabriel de Korponay Empress of the Blues Bessie Smith and the singer Johnnie Ray whom Tony Bennett called the father of rock n roll Their stories and many others animate Broyles's masterly account of how American music became what it is today

The Music of Space Chris Carberry,2024-03-06 Since the early days of motion picture production film scores have helped define our emotional and aesthetic perception of stories on screen particularly with space movies and television The music from *The Day the Earth Stood Still* 2001 *A Space Odyssey* *Star Wars* *Star Trek* *Battlestar Galactica* and others has helped define the public's awareness of space almost as much as the films themselves In some cases they have redefined the norms of film music *Star Wars* not only revived the popularity of orchestral film scores but also helped stimulate an increased public interest in classical orchestral music around the world This work explores the music and the composers who have helped define the sound of space for over a century transforming how we perceive space and even inspiring greater interest in space exploration This book also details how music has been performed and played in space since the early days of the space race

book deals with a specific moment of the history of electronic music narrated through the compositions and experiences of women composers Addressed to lovers of electronic music scholars and non experts *A Short History of Electronic Music and its Women Protagonists* discloses a new and vibrating universe of untold stories *Experiencing Film Music* Kenneth LaFave, 2017-04-01 Of all the elements that combine to make movies music sometimes seems the forgotten stepchild Yet it is an integral part of the cinematic experience Minimized as mere background music film scores enrich visuals with emotional mood and intensity underscoring directors intentions enhancing audiences reactions driving the narrative forward and sometimes even subverting all three Trying to imagine *The Godfather* or *Lawrence of Arabia* with a different score is as difficult as imagining them featuring a different cast In *Experiencing Film Music A Listener's Companion* Kenneth LaFave guides the reader through the history ideas personalities and visions that have shaped the music we hear on the big screen Looking back to the music improvised for early silent movies LaFave traces the development of the film score from such early epic masterpieces as Max Steiner's work for *Gone With the Wind* Bernard Herrmann's musical creations for Alfred Hitchcock's thrillers Jerry Goldsmith's sonic presentation of *Chinatown* and Ennio Morricone's distinctive rewrite of the Western genre to John Williams epoch making *Jaws* and *Star Wars* LaFave also brings readers into the present with looks at the work over the last decade and a half of Hans Zimmer Alan Silvestre Carter Brey and Danny Elfman *Experiencing Film Music A Listener's Companion* opens the ears of film goers to the nuance behind movie music laying out in simple non technical language how composers and directors map what we hear to what we see and not uncommonly back again *Sound Design is the New Score* Danijela Kulezic-Wilson, 2020 The practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long established hierarchical relationships between dialogue music and sound effects but also the modes of perception shaped by classical soundtrack practices The methods of this new trend rely on the language of contemporary popular and art music producing soundtracks in which it is difficult to tell the difference between score and ambient sound where pieces of electroacoustic music are merged with diegetic sound sound effects are absorbed into the score or treated as music and diegetic sound is treated as musique concrète In *Sound Design is the New Score* Kulezic Wilson explores theoretical aesthetic and sensuous dimensions of this new trend providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality The aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience The book's emphasis on sensuous and musical aspects of this practice informed by the feminist discourse on the erotics of art challenges popular notions about sensory cinema demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics it inspires The

discussion is supported by a wide range of case studies from American Independent Asian Australian and European cinemas including films by Shane Carruth Claire Denis Hou Hsiao Hsien Harmony Korine David Mich d Gus Van Sant and Peter Strickland
