Mathematics In Industry 1st European Symposium Proceedings:

Proceedings of the Second European Symposium on Mathematics in Industry H Neunzert, 2012-12-06 Mathematics in Industry since the volume containing the proceedings of the 1985 Oberwolfach conference was published this subject has become more fashionable in Europe America and also in the third world The Europeans have come closer to each other They formed a European Consortium for Mathematics in Industry abbreviated ECMI This ECMI supported mainly by mathematicians from Amsterdam Bari Eindhoven Firenze Kaiserslautern Limerick Linz Paris Oxford and Trondheim has become a legal entity with a rapidly growing number of members It has organized a common really European postgraduate programme establishes contact between industry and universities and organizes other conferences everywhere in the world Industrial mathematics is a special method to get interesting problems a special attitude of curiosity for technical or economical questions a general rather broad knowledge in all branches of mathematics but it always remains real mathematics Our first proceedings contained many articles about why and how to start Now we are more selfconfident about our ideas These proceedings include only examples of how to do It is a pleasure to see how many different kinds of good mathematics are applied to so many different problems from industry Part of the selection criteria for this volume was that some of the applications of what is usually considered ivory tower mathematics be represented **Proceedings of the**

Bodlaender,2003-10-27 The 29th International Workshop on Graph Theoretic Concepts in Computer Science WG2003 was held in the Mennorode conference Center in Elspeet The Netherlands

The workshop was organized by the Center for Algorithmic Systems of the Institute of Information and Computing Sciences of Utrecht University The workshop took place June 19-21 2003 The 72 participants of WG 2003 came from universities and research institutes from 18 different countries and five different continents The workshop looks back at a long tradition It was first held in 1975 and has been held 20 times in Germany twice in Austria and once in Italy Slovakia Switzerland and the Czech Republic and has now been held for the third time in The Netherlands The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can be applied to various areas in computer science or by extracting new problems from applications It is devoted to the theoretical and practical aspects of graph concepts in computer science The goal is to present recent research results and to identify and explore directions of future research The talks given at the workshop showed how recent research results from algorithmic graph theory can be used in computer science and which graph theoretic questions arise from new developments in computer science **Distributed Computing**
