The purpose of *Pedagogy of Humanization: Preparing Teachers for Culturally Sustaining Classrooms* is to build a critical mass of educators who know how to employ the principles of critical pedagogy in elementary classrooms. This includes attention to the various knowledge skills and dispositions required of critical pedagogues in their curricula instruction assessment classroom environment and relationships. From Critical Race Theory (CRT) to restorative justice oriented classroom management, the theoretical is made practical. Moreover, the structure of the book follows the curriculum of a traditional teacher education program, making it complementary to any teacher education course. The *Pedagogy of Humanization* is the first book to bring together the practice, how and theory, what and why of inclusive and asset based teaching. In this book, a group of teacher educators across disciplines explore their personal and professional identities to reveal the potential for applying each tenet of culturally relevant pedagogy in their respective fields. Filled with anecdotes, exercises, user friendly theories and examples, readers will learn how teachers can humanize themselves to have the capacity to be effective teachers of children who have been dehumanized and underserved by traditional teaching and schooling. Pre-service teachers will read this book so that they can connect the material they study in teacher education courses to the daily work of being an educator who aims to be justice oriented. However, this is not a foolproof guide or how-to manual that could be completed without direct support from mentors and colleagues. Instead, readers will practice the sort of engagement in individual and community growth that ignites the possibility of teaching as a force for social change. In many ways, chapters of the text could be used through a flipped classroom approach whereby faculty invert the typical cycle of content acquisition and application. The book will prove to be a valuable resource as a teaching text in classrooms devoted to critical pedagogy. Critical Race Theory, social justice and other topics necessary to produce teachers who are prepared to maximize their effectiveness in educating today's students *Troubling Notions of Global Citizenship and Diversity in Mathematics Education* Anna Chronaki, Ayşe Yolcu, 2025-03-06

This edited volume explores how mathematics education is re-configured in relation to its past, present and future when the rhetoric of critical global citizenship education is being applied to diverse local settings. Drawing upon diverse theoretical and methodological traditions across the globe, including countries in South America, Asia, Australia and Europe, each chapter challenges and eventually troubles the wide circulation of a universal imagery of citizenship based on mathematical competence in not only curriculum, school reforms and policy, but also in teaching and learning practices. Troubling the Euro-centric and global notions of citizenship and diversity, the book foregrounds local practices in mathematics education to portray a broader picture for the current problems of equity, social justice and democracy. The book also engages with critical discussions on how citizens and non-citizen are being fabricated in the context of educational policies and specific mathematical practices. First of its kind to trouble what is at stake when mathematics

education is framed within the discourses of citizenship globally through challenging and problematising what is understood as normal this book will be of relevance to scholars academics and researchers in the field of sociology of education anthropology of education philosophy of education mathematics education citizenship studies and international and comparative education *Resources for Preparing Middle School Mathematics Teachers* Cheryl Beaver,Laurie J.
