On Evaluating Curricular Effectiveness National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematical Sciences Education Board, Committee for a Review of the Evaluation Data on the Effectiveness of NSF-Supported and Commercially Generated Mathematics Curriculum Materials, 2004-11-12 This book reviews the evaluation research literature that has accumulated around 19 K 12 mathematics

curricula and breaks new ground in framing an ambitious and rigorous approach to curriculum evaluation that has relevance beyond mathematics. The committee that produced this book consisted of mathematicians, mathematics educators, and methodologists who began with the following charge: Evaluate the quality of the evaluations of the thirteen National Science Foundation NSF supported and six commercially generated mathematics curriculum materials. Determine whether the available data are sufficient for evaluating the efficacy of these materials and if not, Develop recommendations about the design of a project that could result in the generation of more reliable and valid data for evaluating such materials. The committee collected, reviewed, and classified almost 700 studies, solicited expert testimony during two workshops, developed an evaluation framework, established dimensions, criteria for three methodologies: content analyses, comparative studies, and case studies, drew conclusions on the corpus of studies, and made recommendations for future research. **Resources in Education**, 1998

**Precalculus** Cynthia Y. Young, 2023-05-16 Cynthia Young's *Precalculus* 4th edition helps students take the guesswork out of studying by offering them an easy to read and clear roadmap that tells them what to do, how to do it, and whether they did it right. With this revision, the author focuses on the most difficult topics in precalculus, bringing clarity to challenging learning objectives. *A History of School Mathematics* George M. A. Stanic, Jeremy Kilpatrick, 2003. Written by those who played leading roles in school mathematics, trained historians, and mathematics educators, this two-volume historical record of mathematics education in the United States and Canada serves not only as a partial guide to present actions but as a tool to better understand who we are. The first volume, organized in a roughly chronological manner, takes readers from the mathematics of the nineteenth century through the late twentieth century. Themes discussed in the second volume include instructional materials, students and teachers, assessment, and the role of the government in mathematics education. Additional chapters bring an international perspective to the history. *Aligning and Balancing the Standards-Based Curriculum* David A. Squires, 2004-09-22. Full of field-tested implementation tools, this comprehensive handbook shows how schools and districts can use the Balanced Curriculum process to put their schools on the track to success.

**Innovative Curriculum Materials**, 1999 *Teaching Mathematics in Grades 6 - 12* Randall E. Groth, 2012-08-10. A journey into the vibrant and intriguing world of mathematics education. *Teaching Mathematics in Grades 6-12* explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students' mathematical thinking and then connecting this research to practices that enhance students' understanding of the material. The chapters in Part I introduce secondary teachers to the field of mathematics education with cross-cutting issues that apply to teaching and learning in all mathematics content areas. The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts. The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring

to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies **Catalog of Copyright Entries. Third Series** Library of Congress.
