Maths Express Year 4: Teachers' Resource Book, 2000-01-25 The Numeracy Extras series provides a range of materials developed to be used alongside existing resources as extras to support maths teaching The books in the Maths Express range are designed to stretch the more able pupil in a whole class context and feature challenging exercises *Fast Matrix Multiplication with Applications* Jerzy S. Respondek, 2025-02-26 The ambition of this monograph is to show the methods of constructing fast matrix multiplication algorithms and their applications in an intelligible way accessible not only to mathematicians The scope and coverage of the book are comprehensive and constructive and the analyses and algorithms can be readily applied by readers from various disciplines of science and technology who need modern tools and techniques related to fast matrix multiplication and related problems and techniques Authors start from commutative algorithms through exact non commutative algorithms partial algorithms to disjoint and arbitrary precision algorithms Authors explain how to adapt disjoint algorithms to a single matrix multiplication and prove the famous tau theorem in the not so special case In an appendix authors show how to work with confluent Vandermonde matrices since they are used as an auxiliary tool in problems arising in fast matrix multiplication Importantly each algorithm is demonstrated by a concrete example of a decent

dimensionality to ensure that all the mechanisms of the algorithms are illustrated Finally authors give a series of applications of fast matrix multiplication algorithms in linear algebra and other types of problems including artificial intelligence
