Behind Wei Gao,Xianwei Liu,2021-07-11 Based on the fieldwork carried out at two elementary schools Merits School and
Pioneer School in northeastern China the monograph details how local schools enacted the New Mathematics Curriculum
Reform that was launched in early 2000 The trajectory of the reform implementation at each school was plotted out Both
schools resorted to a long standing quality control mechanism i e teaching norms to operationalize the reform ideas The
mechanism functioned by placing teachers under measurable supervision and evaluation aligned with the reform The schools
responded to the reform following school people s raising practical concerns as well as the established school culture Merits
School arrived at a two faced strategy to cope with the reform Pioneer School managed to maintain a balance between
promoting reform pedagogy and maintaining good test rankings Both schools marginally involved parents in the
implementation of the reform This study suggests that to achieve success reformers need to place equal emphasis on the
transformation of teachers as well as local policymakers This book enriches the existing literature on the implementation of
mathematics curriculum reform at the school level and brings insights into the schools implementation decisions which will
appeal to policymakers curriculum researchers and administrators Research in Education ,1969 **Processing**

feel we should explore whether there is a specific thrust to mathematics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems little point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the balanced interplay of knowledge and understanding can we expect to achieve genuine education
