*The Mathematics of Juggling* Burkard Polster, 2002-10-31 As a juggler the author likes to finish his performances with a stunt that combines props and techniques from a variety of juggling disciplines Imagine him idling on a giraffe unicycle while balancing a spinning basketball on a mouth stick and toss juggling a sword a toilet plunger and a rubber chicken As a mathematician he is also interested in the treasure trove of beautiful mathematics used to model the different activities in a juggler's repertoire In this book he provides an intellectually stimulating collection of mostly self contained mathematical essays that introduce the reader to many elegant results and techniques from a wide range of mathematical disciplines such as combinatorics graph theory knot theory mechanics differential equations control theory and robotics *The Mathematics of Juggling* is the first comprehensive account summarizing and expanding the results in the literature on juggling tricks and skills as well as the mathematics behind these tricks and skills Anybody who is not put off by the word mathematics in the title of this book should have a good time reading it

**The Sociology of Mathematics Education** Paul Dowling, 2002-11-01 Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use
