D. Hamilton* W. D. Hamilton,1996 The third volume of the collected papers of W D Hamilton continues his work on sex and particularly its relation to parasitic disease also including the Gaia theory the colours of autumn leaves and the controversial hypothesis that the AIDS pandemic accidentally originated in a polio vaccination campaign in Africa **People of the Rainforest** John Hemming,2020-02-01 In 1945 three young brothers joined and eventually led Brazil s first government

Sklar,Arnold van der Valk,2012-12-06 PREFACE Within the Florida Everglades tree islands which cover only a small percent of this ecosystem historically have provided essential habitat for a wide variety of terrestrial and amphibious plants birds and animals These tree islands however have been one of its least studied features Because of their less flood tolerant vegetation tree islands are one of the most sensitive components of the Everglades to changes in hydrology and many tree islands have been lost during periods when water levels have been abnormally high or low Their sensitivity to water level changes makes tree islands potentially one of the best and surest measures of the overall hydrologic health of the Everglades Consequently the maintenance of healthy functioning tree islands and the restoration of those that have been lost will be an important performance measures that will be used to judge the success of the Comprehensive Everglades Restoration Plan CERP A symposium Tree Islands of the Everglades was held on July 14 and 15 1998 at Florida Atlantic University Boca Raton Florida It was sponsored by Florida Center for Environmental Studies and the South Florida Water Management District This was the first scientific meeting ever devoted to tree islands The organizers of this symposium were Drs Arnold van der Valk Florida Center for Environmental Studies and Iowa State University Fred Sklar South Florida Water Management District and Wiley

Goldsmith, 2012-12-06 The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance **Area Handbook for Brazil** Thomas E.
