

# The Thirsty Crow

One hot day, a thirsty crow flew all over the fields looking for water. For a long time, he could not find any. He felt very weak, almost lost all hope. Suddenly, he saw a water jug below the tree. He flew straight down to see if there was any water inside. Yes, he could see some water inside the jug!

The crow tried to push his head into the jug. Sadly, he found that the neck of the jug was too narrow. Then he tried to push the jug to tilt for the water to flow out but the jug was too heavy.

The crow thought hard for a while. Then looking around it, he saw some pebbles. He suddenly had a good idea. He started picking up the pebbles one by one, dropping each into the jug. As more and more pebbles filled the jug, the water level kept rising. Soon it was high enough for the crow to drink. His plan had worked!

Einasto, 2024-04-29 The concepts of dark matter and the cosmic web are some of the most significant developments in cosmology in the past century. They have decisively changed the classical cosmological paradigm which was first elaborated upon during the first half of the 20th century but ran into serious problems in the second half. Today they are integral parts of modern cosmology which explains everything from the Big Bang to inflation to the large scale structure of the Universe. Dark Matter and Cosmic Web Story describes the contributions that led to a paradigm shift from the Eastern point of view. It describes the problems with the classical view, the attempts to solve them, the difficulties encountered by those solutions, and the conferences where the merits of the new concepts were debated. Amidst the science, the story of scientific work in a small country occupied by the Soviet Union and the tumultuous events that led to its breakup are detailed as well. The development of cosmology has often been treated as a West-East conflict between the American school led by Jim Peebles in Princeton and the Soviet team led by Yakov Zel'dovich in Moscow. Actually, the development of ideas was broader, and a certain role was played by the Tartu team. The Tartu cosmology school was founded by Ernst Pikel and has its own traditions and attitude to science. In the new edition of the book, the interplay between three cosmology schools is written in more detail. The recent development of dark matter and cosmic web studies is described as well as the evolution of global properties of the cosmic web. This book is accompanied by a website which contains additional material, copies of the originals of some crucial papers, astronomical movies, and movies which showcase the private life of the author. In this second edition, two chapters on the statistical
