Mergers In The New Antitrust Era:

Mergers in the New Antitrust Era Thomas W. Brunner, 1985 **Horizontal Mergers** William Blumenthal, 1986 Number 14 in the Antitrust law Section monograph series this work summarizes the state of the law in every area affecting semihorizontal conglomerate and vertical mergers and was prepared as a companion to Monograph 12 **Killer Acquisitions in Digital Markets: An Analysis of the EU Merger Control Regime** Giulia Sonderegger, 2024-06-10 In her PhD thesis Giulia Aur lie Sonderegger analyses killer acquisitions which in short are acquisitions that aim to pre empt potential future competition at an early stage While this phenomenon was originally discovered in pharmaceutical markets this thesis exclusively discusses killer acquisitions in the context of digital markets thereby primarily focusing on the current European Merger Control Regulation EUMR The main research question is whether the EUMR is appropriate to tackle killer acquisitions occurring in digital markets and if not in what ways it needs to be amended to better address the challenges in the future To tackle this question the author assesses both the economic and legal effects of killer acquisitions on merger control in digital markets and based on her findings suggests amendments to the current European merger control regime For a more comprehensive analysis this thesis also includes an assessment of the recently enacted Digital Markets Act DMA to ascertain whether this regulation may serve as an additional tool to remedy such transactions Research on the Management of Innovation Andrew H. Van de Ven, Harold L. Angle, Marshall Scott Poole, 2000-09-07 This is a reprint of a classic work of research on innovation first published in 1989 Resulting from the Minnesota Innovation Research Program MIRP the book includes a revised and expanded Preface and will complement the three other books growing out of the program all published by Oxford The Innovation Journey 1999 Organizational Change Processes Theory and Methods for Research 2000 and Handbook of Organizational Change and Development coming 2001 **Compliance Manuals for the New Antitrust Era** , 1990 Compendium of representative antitrust compliance manuals in use by American corporations and trade associations **Global Competition** David Gerber, 2012-01-26 A key factor in the emerging relationship between law and economic globalization is how global competition now shapes economies and societies Competition law is provided by those players that have sufficient power to apply their laws transnationally This book examines this important and controversial aspect of globalization The Governance of Global Competition Oliver Budzinski, 2008-01-01 highly recommendable to anyone interested in international competition policy Arndt Christiansen European Competition Law Review This book provides a comprehensive and refreshing analysis of the competition issues raised by the globalisation of markets It draws on a very wide range of economic and legal sources to assess the manifold proposals for controlling the competitive forces released by the freeing up of world markets All those interested in these important and largely unresolved issues will find it an invaluable source of reference Michael A Utton University of Reading UK and Dongbei University of Finance and Economics Dalian China The globalization of market competition and business behaviour fosters globalization of

cartels and monopolising mergers that can lead to abusive and predatory strategies The globalization of competition therefore also demands an internationalization of competition policy However Oliver Budzinski is realistic in his assertion that supranational competition governance must be built upon the existing predominantly national regimes The resulting multilevel system of antitrust institutions and authorities he argues is problematic for the horizontal and vertical allocation of competences This book employs the economics of federalism to create an analytical framework which can be used for comparative analysis of stylised competence allocation rules The result is a proposal for a sound international multilevel competition policy system that combines elements of both centralized and decentralized governance This book provides an innovative and unique perspective on international competition policy and will be of interest to economists legal scientists and competition authorities as well as academics and practitioners of international governance and international relations and politics

The Oxford Companion to United States History Paul S. Contemporary Regulatory Policy Marc Allen Eisner, Jeffrey Worsham, Evan J. Ringquist, 2000 This volume examines regulatory trends and political control of the regulatory process in seven major areas antitrust banking and securities telecommunication environmental protection occupational safety and health consumer products and energy

Regulating Broadcast Programming Thomas G. Krattenmaker, 1994 The authors argue that TV regulation should be based on the same principles used for print media for which control of editorial content lies in private hands rather than the government
