Merleau Ponty Basic Writings:

Maurice Merleau-Ponty: Basic Writings Thomas Baldwin, 2004-02-24 Merleau Ponty was a pivotal figure in twentieth century French philosophy He was responsible for bringing the phenomenological methods of the German philosophers Husserl and Heidegger to France and instigated a new wave of interest in this approach His influence extended well beyond the boundaries of philosophy and can be seen in theories of politics psychology art and language This is the first volume to bring together a comprehensive selection of Merleau Ponty s writing Sections from the following are included The Primacy of Perception The Structure of Behaviour The Phenomenology of Perception The Prose of the World The Visible and the Invisible Sense and Non Sense The Adventures of the Dialectic In a substantial critical introduction Thomas Baldwin provides a critical discussion of the main themes of Merleau Ponty s philosophy connecting it to subsequent philosophical debates and setting it in the context of the ideas of Bergson Husserl Heidegger and Sartre Each text is also prefaced with an explanation which sets it in its context in Merleau Ponty s work and there are extensive suggestions for further reading to enable students to pursue the issues raised by Merleau Ponty Thus the book provides the ideal materials for students studying Merleau Ponty for the first time

Unseparate Steven Henry Madoff, 2025-10-21 Art historian and critic Steven Henry Madoff offers a contemporary

reframing of modernist art and the way it presages installation and performance art For more than a century European modernist art has been written about as a profound expression of fragmentation of an alienated world in pieces In Unseparate Steven Henry Madoff proposes that there was always another artistic intention present among the modernists offering visions of wholeness in the face of the instability and alienation brought on by war and new technologies Blending history philosophy and media theory Madoff argues that from the mid nineteenth century when Richard Wagner championed his idea of the Gesamtkunstwerk the total work of art to the rise of the Bauhaus the urge to connect different art forms into single unified works anticipates our contemporary networked culture Madoff revisits the artworks and projects of such leading figures of European modernism as Paul C zanne Marcel Duchamp Hugo Ball and Walter Gropius proposing that their various ambitions for totality were both aesthetically beneficent and politically dangerous This striking contemporary rethinking gives readers a way to understand modernism s complex history more fully Modernism seen through the lens of network aesthetics and its emphasis on interconnectivity presages many different forms of contemporary art including installation and performance art Further as Madoff reveals the modernist drive for wholeness and unity can give us a way to look at our own increasingly divisive society The Intersubjectivity of Embodiment , Spatiality and Symbolic Expression Bill Richardson,2015-07-22 In this volume scholars from a wide range of fields within the humanities explore the links between space and place and their relation to cultural expression This collection shows that a focus on the spatial can help elucidate important facets of symbolic expression and cultural production whether it be literature music dance films or art *The Historical Turn in Analytic Philosophy* E. Reck,2013-03-27 During the last 25 years a large number of publications on the history of analytic philosophy have appeared significantly more than in the preceding period As most of these works are by analytically trained authors it is tempting to speak of a historical turn in analytic philosophy The present volume constitutes both a contribution to this body of work and a reflection on what is or might be achieved in it The twelve new essays by an international group of contributors range from case studies on individual philosophers Russell Carnap Quine and Ryle through discussions of broader themes in the history of analytic philosophy in logic and philosophy of language philosophy of mathematics epistemology philosophy of mind and psychology to related methodological reflections on the relationship between doing analytic philosophy and studying the history of philosophy on various forms of philosophical history and on their respective benefits *Integral Theory and Transdisciplinary Action Research in Education* Bohac Clarke, Veronika,2018-12-28 With its growing recognition in education the importance of Integral Theory is slowly entering mainstream academia through interdisciplinary and transdisciplinary research Addressing the theory s complexity is important for researchers to learn how to apply it in their classrooms and promote a more inclusive educational environment Integral Theory and Transdisciplinary Action Research in Education provides emerging research exploring the theoretical and practical aspects of the Integral Theory model and its applications within educational contexts With a diverse array of

research problems approached through an inclusive theory framework and featuring coverage on a broad range of topics such as graduate student research inclusion culture and organizational learning processes this publication is ideally designed for graduate students educators academicians researchers scholars educational administrators and policymakers seeking current research on the utility and promise of Integral Theory as a meta framework for methodological pluralism and transdisciplinary research
