Message For The Media:

Men, Women, Messages, and Media Wilbur Schramm, William Earl Porter, 1982 Media Messages Linda Holtzman, Leon Sharpe, 2014-03-15 The new edition of this widely acclaimed book reveals how the popular media contributes to widespread myths and misunderstanding about cultural diversity Along with updated media examples expanded theories and analysis this edition explores even more deeply the coverage of race in two chapters discusses more broadly how men and boys are depicted in the media and socialized and how class issues have become even more visible during the Great Recession of the 21st century and the Occupy movements *Measuring Psychological Responses To Media Messages* Annie Lang, 2014-04-08 Characterized by its multi level interdisciplinary character communication has become a variable field one in which the level of analysis varies This has had important ramifications for the study of communication because to some extent the questions one asks are determined by the methods one has available to answer them As a result communication research is characterized by the plethora of both qualitative and quantitative approaches used by its practitioners These include survey and experimental methods and content historical and rhetorical analyses A variety of tools has been developed in cognitive psychology and psychophysiology which attempts to measure thinking without asking people how they do it This book is devoted to exploring how these methods might be used to further knowledge about the process of communication The methods chosen have all been used extensively in cognitive and experimental psychology Each chapter in this book is designed to describe the history of the method being introduced the theory behind it how to go about using it and how it has already been used to study some area of communication The methods introduced here vary widely in terms of the amount of equipment and training needed to use them Some require only theoretical knowledge and a paper and pencil others require more elaborate hardware and software for implementation These methods also vary widely in terms of what sorts of variables they can be used to measure Some of them adapt quite readily to traditional communication variables like persuasion attitude change and knowledge others are more applicable to process type variables such as attention arousal involvement encoding and retrieval **Getting the Message** John Eldridge, 2003-09-02 The work of the Glasgow Media Group has long established their place at the forefront of Media Studies and Getting the Message provides an ideal introduction to recent work by the Group Contributors discuss themes such as the relationship between the media and public opinion the emergence of TV news formats and styles and the relations between theory and method in media research Recent work undertaken by the Group on the media's role in reporting on AIDS Vietnam Northern Ireland and the Gulf War is also represented In its fresh approach to the relationship between journalists and their sources and occupation analysis the collection also illuminates how the earlier work of the group has been extended and the ways in which its research has developed both individually and collectively Getting the Message offers an invaluable and far reaching exploration of the inter relations between the production of media messages and their reception an invaluable guide for any study of the

development of media theory *The Effects of the Mass Media on the Use and Abuse of Alcohol* Susan Ehrlich Martin, Patricia D. Mail, 1995 Assesses the presentation of alcohol in the mass media Intended to stimulate policy relevant research Contains a collection of articles on the mass media alcohol and culture an overview a review of research on alcohol advertising and media content advertising and marketing applying the principles practices and outcomes to alcoholic beverages health promotion public service announcements media campaigns and media advocacy and a synthesis of the issues Illustrated Ubiquitous Services and Applications Claudio Carrelli, 2005 *Media in Church and Mission* Viggo Sogaard, Viggo Sogaard, 1993 Summarizing the Dimensions of Christian Communication Too many today are borrowing uncritically from the world of secular marketing and seem to be blithely unaware that the gospel is not a consumer product to be sold persuasively to a waiting world There is a great temptation to be so focused on felt needs that the gospel ceases being the narrow way and becomes instead a broad way to human fulfillment Unless real caution is exercised masses are attracted and churches become filled with those to whom Christianity is only a veneer over an otherwise secular life Sogaard succeeds in driving home the sometimes forgotten point that strategies no matter how skillfully they are conceived are destined to failure unless it is fully recognized that the Holy Spirit is the ultimate persuader There is in short a mysterious interworking between strategies and the ministry of the Holy Spirit An imbalance on either side of this equation is untenable The majority of the chapters offer practical insights into how such media as audio cassettes radio film and television can if properly used play an important role in conversion and spiritual growth But the author never loses sight of the fact that the single most important medium is face to face communication in the context of the local Christian fellowship *Arguing for a General Framework for Mass Media Scholarship* W. James Potter, 2008-12-11 Arguing for a General Framework for Mass Media Scholarship challenges scholars and students to consider and reconsider what we know about media and how we think about media As such the book provides an important framework for thinking about knowledge regardless of the discipline The text provides all of the necessary tools to move the field forward in a way that will increase the rigor of the work being done and augment the overall profile of the discipline Dana Mastro University of Arizona In this groundbreaking book W James Potter presents an innovative perspective to media scholars and students who are frustrated with the fragmentation of research findings across so many journals books and fields Arguing for a General Framework for Mass Media Scholarship presents a clear plan for a more efficient way to build knowledge about the mass media so that it can be better organized and made more useful Key Features Conducts an in depth analysis of mass media scholarship s four major facets of effects content audiences and organizations Presents a significant shift in conceptualizing media effects and ways research can be conducted to generate more useful knowledge about media influence Develops narrative line as a tool to guide analyses about how content decisions are made by producers Synthesizes a system of explanation about why audiences attend to certain messages and how individuals construct meaning from those messages Incorporates an analysis of mass media

organizations to provide greater context of understanding messages and their effects on individuals and macro units in society The book will play an important role in providing structure to a broad fragmented discipline I believe it will at the very least create important dialogues about what we now know understand about areas of mass media and where we should move as a discipline This book is clearly a call to arms for mass media scholars to ratchet up the quality of research and what we know to see the interconnections within and among strands of scholarship and to move forward in a more efficient organized manner Professor Potter should be commended for this Roger Cooper Ohio University This book is that call to action that comes forward every few years to wake us up and challenge our ways of doing things not by being radical but via synthesis I ve been waiting for several years for a book like this Sahara Byrne Cornell University

Celebrity Media Effects Carol M. Madere, 2018-11-01 America is fascinated with celebrities from chefs to athletes to television movie and rock stars and even to people who are only famous for being famous This book explores the effect of celebrity on Americans public and private lives The contributors examine how celebrities bring about change whether intentionally or unintentionally and whether those changes are good or bad for the public that loves and follows them They also discuss the flattening of celebrity and what the rise of pseudo celebrity portends for a society that accords fame without substantial accomplishment Topics explored include health philanthropy activism and celebrity attitudes toward feminism and police brutality all issues that fall under the cultural magnifying glass today Recommended for scholars of media studies popular culture and sociology

Sex, Love, and Romance in the Mass Media Mary-Lou Galician, 2013-11-05 Volume offers a critical examination of the portrayals of relationships in the various media and debunks the myths perpetuated there For courses in media criticism media literacy mass communication interpersonal communication
