Springer, Lothar Träger, Liane Will-Shahab, James L. Wittliff, 2013-03-07 With contributions by numerous experts [Metal Complexes in Cancer Therapy](#) Bernhard K. Keppler, 1993 *Metal Complexes for Cancer Chemotherapy* Philip James Miles, 2009 [Metal Compounds in Cancer Therapy](#) S.P. Fricker, 2012-12-06 The discovery of the antitumour activity of cisplatin in 1965 and its subsequent introduction into clinical trials in 1971 was the catalyst for a major international research effort investigating the potential of metal compounds in cancer therapy Cisplatin now occupies an important place in the armamentarium of the oncologist due to its effectiveness in the treatment of testicular cancer A second generation analogue carboplatin offers reduced toxicity together with therapeutic activity which gives it a place in the front line therapy of genitourinary cancers These and other successes have encouraged the search for novel metal based drugs for cancer therapy Research has shown that metal compounds have potential for activity not only as cytotoxic antitumour agents but also in areas such as adjuvant therapy diagnosis and immunotherapy The aim of this book is to review and describe the major achievements and developments arising from this international research effort The contributing authors come from laboratories throughout Europe and

America and represent the many disciplines characteristic of this research such as clinical research pharmacology tumour biology and inorganic medicinal chemistry **Platinum Coordination Complexes in Cancer Chemotherapy** Miles P.

Hacker,Evan B. Double,Irwin H. Krakoff,2012-12-06 The idea for convening a Fourth International Symposium on Platinum Coordination Complexes in Cancer Chemotherapy was born in an assembly of researchers from the Vermont Regional Cancer Center and the Norris Cotton Cancer Center who shared a common interest in metal complexes It was agreed by those assembled that sufficient time had passed since the Third International Symposium on Platinum Coordination Complexes in Cancer Chemotherapy held in 1976 at the Wadley Institutes of Molecular Medicine in Dallas Texas during which several advances in the chemistry biochemistry pharmacology and clinical use of platinum complexes had occurred to warrant a fourth symposium Furthermore intensive investigations in progress were bringing sophisticated methodologies to bear on the problems in the field clinical trials were yielding interesting results and unique approaches to cancer therapy were being designed Therefore an organizing committee was formed and planning culminated in the symposium which was held in Burlington Vermont June 22-24 1983 **Gold and its Complexes in Anticancer Chemotherapy** Mohammad Younus

Wani,Manzoor Ahmad Malik,2021-02-11 This book presents an overview of cancer and the genesis and development of different treatment strategies and modalities against cancer The emergence of gold and its complexes as promising anticancer chemotherapeutic agents have the potential to substitute or replace the platinum based chemotherapeutic agents Gold complexes have demonstrated considerable anti proliferative properties chiefly attributed to their anti mitochondrial effects they make gold complexes excellent candidates as anti cancer agents compared to their platinum based counterparts This book provides a critical review of recent advances made in the development of gold complexes as anti cancer agents In this context it examines a number of different ligand architectures provides comprehensive information on gold complexes mechanism of action and toxicity issues and in closing outlines future research directions **Transition Metal Complexes as Drugs and Chemotherapeutic Agents** N. Farrell,2012-12-06

When this book was first conceived as a project the expanding interest in the clinical use of platinum and gold complexes made a survey of the relevant biological properties of metal complexes timely and appropriate This timeliness has not diminished during the gestation and final publication of the manuscript The introduction contains an explanation of the layout and approach to the book which I wrote as an overall survey of the wide variety of biological properties of metal complexes Hopefully the reader will see the parallels in mechanisms and behavior even in different organisms The writing was considerably helped by the enthusiasm and confidence totally unearned on my part in the project of Professor Brian James and owe him my special thanks I also owe a great debt of gratitude to my colleagues and especially to Eucler Paniago of the Universidade Federal de Minas Gerais for their comprehension and for the initial leave of absence which allowed me to begin the project To those who read some or all of the manuscript and made suggestions Bernhard Lippert Kirsten Skov and Tom Tritton as well as the editor's reviewer I am

also grateful As usual the final responsibility for errors or otherwise rests with the author
