Metallized Plastics K. L. Mittal, J. R. Susko, 1989 **Metallized Plastics 2** K.L. Mittal, 1992-03-31 This volume documents the proceedings of the Second Symposium on Metallized Plastics Fundamental and Applied Aspects held under the aegis of the Dielectric Science and Technology Division of the Electrochemical Society in Montreal Canada May 7 10 1990 The first symposium on this topic was held in Chicago October 10 12 1988 and the proceedings of which have been chronicled in a hard bound volume I As pointed out in the Preface to the proceedings of the first symposium the metallized plastics find scores of applications ranging from very mundane to very sophisticated Even a cursory look at the literature will convince that this field has sprouted and there is every reason to believe that with all the research and development activities taking place new and exciting applications of metallized plastics will emerge The program for the second symposium was very comprehensive as it included 46 papers covering many aspects of metallized plastics This symposium was a testimonial to the brisk research activity and keen interest in the topic of metallized plastics The success of this symposium reinforced our earlier belief that there was a definite need to hold symposia on this topic on a regular basis Concomitantly the third symposium in this vein was held in Phoenix Arizona October 13 18 1991 and the fourth is planned for May 16 21 1993 in Honolulu Hawaii As regards the present volume it contains a total of 35 papers covering a variety of topics ranging from very fundamental to very applied

Metallized Plastics 1 K.L. Mittal, J.R. Susko, 2013-11-11 This volume chronicles the proceedings of the Symposium on Metallized Plastics Fundamental and Applied Aspects held under the auspices of the Dielectrics and Insulation Division of the Electrochemical Society in Chicago October 10 12 1988 This was the premier symposium on this topic and if the comments from the attendees are any barometer of the success of a symposium then it was a grand success Concomitantly it has been decided to hold it on a regular basis at intervals of 18 months and the second event in this series is planned as a part of the Electrochemical Society meeting in Montreal Canada May 6 10 1990 Metallized plastics find a legion of applications ranging from mundane to very sophisticated A complete catalog of the various technological applications of metallized plastics will be prohibitively long so here some eclectic examples should suffice to show why there is such high tempo of R D activity in the arena of metallized plastics and all signals indicate that this high tempo will continue unabated For example polymeric films are metallized for packaging food and other products purposes and the applications of metallized plastics in the automotive industry are quite obvious In the field of microelectronics and computer technology insulators are metallized for interconnection and other functional purposes Also plastics are metallized to provide electromagnetic shielding

Metallized Plastics 3 K.L. Mittal, 2012-12-06 This volume chronicles the proceedings of the Third Symposium on Metallized Plastics Fundamental and Applied Aspects held under the auspices of the Dielectric Science and Technology Division of the Electrochemical Society in Phoenix Arizona October 13 18 1991 This series of symposia to address the subject of metallized plastics was initiated in 1988 and the premier symposium

was held in Chicago October 10-12 1988 followed by the second event in Montreal Canada May 7-10 1990 The proceedings of these two symposia have been properly documented 2 The third symposium was a huge success like the previous two events and all this is testimonial to the brisk interest and high tempo of R D activity in the field of metallized plastics This further bolsters our earlier thinking that there was a conspicuous need to hold symposia on this topic on a regular basis and the fourth is planned for May 16-21 1993 in Honolulu Hawaii The study of metallized plastics constitutes an important human endeavor and as pointed out earlier there are myriad applications of metallized plastics ranging from very commonplace to exotic Also a survey of the recent literature will reveal that both the fundamental and applied aspects of metallized plastics are being pursued with great vigor

Metallized Plastic K.L. Mittal, 1997-11-06 Integrates the latest findings on metallized plastics and their far reaching applications by more than 80 recognized experts from North America Europe the Middle East and Asia Addresses both basic and applied aspects of the subject

Metallization of Polymers 2 Edward Sacher, 2012-12-06 As the demands put on the polymer metal interface particularly by the microelectronics industry become more and more severe the necessity for understanding this interface its properties and its limitations becomes more and more essential This requires a broad knowledge of and a familiarity with the latest findings in this rapidly advancing field At the very least such familiarity requires an exchange of information particularly among those intimately involved in this field Communications among many of us in this area have made one fact quite obvious the facilities provided by existing organizations scientific and otherwise do not offer the forum necessary to accomplish this exchange of information It was for this reason that Jean Jacques Pireaux Steven Kowalczyk and I organized the first Metallization of Polymers a symposium sponsored by the American Chemical Society which took place in Montreal September 25-28 1989 the Proceedings from that symposium were published as ACS Symposium Series 440 1990 It is this same perceived lack of a proper forum and the encouragement of my colleagues that prompted me to organize this meeting so as to bring to the attention of the participants new instruments materials methods advances and particularly thoughts in the field of polymer metallization The meeting was designed as a workshop with time being made available throughout for discussion and for the consideration of new findings
