Models of Figurative Language Rachel Giora, 2001-09-01 First published in 2001 Volume 16 Numbers 3 4 This special issue is an attempt to record the state of the art of psycholinguistics research into figurative language There are quite a number of models addressing distinct issues and aiming to solve different problems the mark of a maturing field Indeed not one theory is tailored to solve all the problems Rather each model while aiming at generality also recognizes its limitation Despite specializing in different topics most of the theories presented here have some things in common For one most of them dispense with the literal nonliteral divide proposing instead models that are capable of handling literal as well as figurative language Some models focus on the role primary meanings play in comprehension others shed light on context effects and some models seem to encompass both in terms of the accumulating effects of constraints whether linguistic or contextual

Metaphor in Psychotherapy Dennis Tay, 2013-07-25 This book represents a bold attempt to address contemporary issues in both metaphor and psychotherapy research On one hand metaphor research is increasingly concerned not just with describing metaphors in discourse but how they could be used more adroitly in purposive real world contexts such as psychotherapy On the other hand while a growing number of mental health professionals believe that metaphors contribute in some way to the psychotherapy process their ability and willingness to use metaphors might be compromised by a relative unfamiliarity with the various nuanced aspects of metaphor theory The present analysis of metaphors in authentic psychotherapeutic talk brings these theoretical aspects to the forefront and suggests how they can be applied to enhance the use of communication of metaphors in psychotherapy It should be of interest to metaphor researchers mental health professionals and discourse analysts in general

The Construction of Metaphoric Text and Talk Meizhen Liao, 2024-08-09 The Construction of Metaphoric Text and Talk A Discourse Analytic Approach argues that in view of their omnipresence in human thinking and action metaphors play a very important role in discourse construction and organization and this role can be textural and textual In order to explore the textual role of metaphors Meizhen Liao proposes that metaphors in discourse be treated as a complex adaptive system CAS which is further composed of two sub systems a micro one consisted of the tenor and the vehicle and a macro one made up of different

metaphors The dynamic interaction within the micro system between the tenor and the vehicle in terms of mapping as well as among the macro system of all the metaphors in the text or talk via competition cooperation or complementation contributes to the construction and organization of discourse as an adaptive process in pursuit for the goal or goals of the discourse In the process of the interaction emergent textual patterns develop and an adequate analysis of the patterns at both micro and macro as well as deep and surface levels of discourse will shed light on the true nature and pattern of human thinking and action The author concludes that as metaphor has become entrenched in our conceptual system the study of metaphor as a complex adaptive system in discourse be conducted in its own right
