Metaphysics Of Creation:

The Metaphysics of Creation Norman Kretzmann, 1999-06-17 About Aquinas St Thomas Aquinas lived from 1224 to 1274 mostly in his native Italy but for a time in France He was the greatest of the medieval philosopher theologians and one of the most important of all Western thinkers His most famous books are the two summaries of his teachings the Summa contra gentiles and the Summa theologiae About this book Norman Kretzmann expounds and criticizes Aquinas's natural theology of creation which is natural or philosophical in virtue of Aquinas's having developed it without depending on the data of Scripture The Metaphysics of Creation is a continuation of the project Kretzmann began in The Metaphysics of Theism moving the focus from the first to the second book of Aquinas's Summa contra gentiles Here we find Aquinas building upon his account of the existence and nature of God arguing that the existence of things other than God must be explained by divine creation out of nothing He develops arguments to identify God's motivation for creating to defend the possibility of a beginningless created universe and to explain the origin of species He then focuses exclusively on creatures with intellects with the result that more than half of his natural theology of creation constitutes a philosophy of mind Kretzmann gives a masterful guide through all these arguments As before he not only expounds Aquinas's natural theology but advocates it as the best historical instance available to us

Aquinas and the Metaphysics of Creation Gaven Kerr OP, 2019-07-01 In this book Gaven Kerr expands on the brief treatment of creation offered in his 2015 volume Aquinas's Way to God The Proof in De Ente et Essentia Aquinas does not offer one cohesive treatment on the issue of creation Kerr synthesizes discussions from across his works in order to present a unified Thomistic metaphysics of creation Kerr argues that Aquinas's metaphysics of creation wherein God is conceived as the absolute source of all that exists is the backbone of his philosophical theology Throughout his writings the framework of the absolute dependence of creatures on God and of the independence of God as existence itself is ever present Without understanding this aspect of Aquinas's philosophical thought Kerr suggests it is impossible to understand his philosophy of God When it comes to metaphysics Thomas is committed to thinking through the issues involved therein on the basis of natural reason Aquinas and the Metaphysics of Creation demonstrates Aquinas's belief that we must arrive at an affirmation of the existence of God on the basis of a wider metaphysical view as to the constitution of reality a view that does not presuppose divine truths but can indeed establish them

The Metaphysics of Creation, 1999 Norman Kretzmann expounds and criticises Aquinas theology of creation which is natural or philosophical in that Aquinas developed it without depending on the data of Scripture Matter as an Image of the Good Rachel M. Coleman, 2025-07-03 The question of matter has been a quiet but enduring question in our desire to know being and therefore to know ourselves since we began to ask questions about the nature of being at all Indeed in the Timaeus Plato writes that matter is only graspable by some bastard reasoning The use of this evocative adjective is not meant simply to indicate that matter is bad or the source of all evil but rather indicates matter's middleness not exactly being itself but also not nonbeing simpliciter Thus

thinking about matter cannot happen in the usual way Ferdinand Ulrich is not a usual thinker and this book seeks to illuminate Ulrich's radical way of thinking being and thinking being as gift which is to say it seeks to explain Ulrich's metaphysics of creation It does so in light of Ulrich's understanding of matter which has a central place in his work and indeed is for Ulrich the test case for whether any metaphysics is sufficiently radical

Creation and Metaphysics Herve J. Thibault, 2013-11-21 During the last twenty five years or so studies in Thomistic existentialism have repeatedly indicated that the notion of creation played a decisive role in St Thomas Aquinas' view of existence as an existential act or *actus essendi* The importance for metaphysics of this view of existence as act warrants an investigation of the relation between creation and *actus essendi* for St Thomas is the only one in the history of philosophy to have considered existence as an act of being This study will be limited to the early works of St Thomas By the time of the *Summa Contra Gentiles* he had reached the key positions of his metaphysics And the first fifty three chapters of the *Summa Contra Gentiles* were written in Paris before June 1259 the rest was completed in Italy before 1265 The project was therefore conceived by St Thomas during the first period of his career How the notion of creation enabled him to transform the Aristotelian metaphysics of essence into a metaphysics of *esse* can be seen from three sections of the *Summa Contra Gentiles* Although primarily a theological treatise the *Contra Gentiles* nevertheless accomplishes a radical metaphysical transformation of Aristotelianism by shifting the whole perspective from *esse in actu per se* to *actus essendi* Seen from the perspective of existential act as the absolute perfection metaphysics is raised to a strictly transcendental plane of consideration

Creation and Metaphysics Herve J. Thibault, 2014-09-01

Metaphysics Adrian Pabst, 2012-05-04 This book does nothing less than to set new standards in combining philosophical with political theology Pabst's argument about rationality has the potential to change debates in philosophy politics and religion from the foreword This comprehensive and detailed study of individuation reveals the theological nature of metaphysics Adrian Pabst argues that ancient and modern conceptions of being or individual substance fail to account for the ontological relations that bind beings to each other and to God their source On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism Pabst proposes that the Christian Neo Platonic fusion of biblical revelation with Greco Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality

Poet of Heaven & Earth Larry Rinehart, 2017-02-22 This book challenges the claim of the modern sciences to explain the degree of order observed in nature It argues that a traditional metaphysical perspective is required for the explanation of this order and derives such a perspective from the book of Genesis Finally it connects the metaphysics with biochemistry and offers a model of terrestrial biogenesis

Dust Bound for Heaven Reinhard Hütter, 2012-10-01 In *Dust Bound for Heaven* Reinhard Hütter shows how Thomas Aquinas's view of the human being as dust bound for heaven weaves together elements of two questions without fusion or reduction Does humanity still have an insatiable thirst for God that sends each person on an irrepressible religious quest that only the vision of God can quench Or

must the human being living after the fall become a new creation in order to be readied for heaven. He also applies Thomas's anthropology to a host of pressing contemporary concerns including the modern crisis of faith and reason, political theology, the relationship between divine grace and human freedom, and many more. The concluding chapter explores the Christological center of Thomas's theology.

A Metaphysics of Creation for the Information Age Liran Shia Gordon, 2022-05-23

The metaphysical and theological writings of John Duns Scotus (1265–1308), one of the most intriguing albeit if now high forgotten philosophers of the late Middle Ages, were seminal in the emergence of modernity. *A Metaphysics of Creation for the Information Age: A Dialogue with Duns Scotus* uses the prism of the concept of Creation as the leitmotif to assemble and interpret Scotus's system of thought in a unified manner. In doing so, Liran Shia Gordon reframes Scotus's metaphysics such that it confronts the challenges posed by information technology and its impact on our lives, thought, and actions. Surprisingly, although there has been great interest in the emergence and dissemination of information technology through the popular media, there has not yet been a genuine and vigorous philosophical consideration of the multiple ways information technology alters the basic categories by which we perceive and understand reality. Juxtaposing medieval philosophy and information technology offers an unconventional horizon to frame the foundational changes carried by the information revolution and reassess the relevancy of medieval philosophy.
