Metaphysics Classic And Contemporary Readings

John Lemos

Metaphysics Classic And Contemporary Readings:

Metaphysics Ronald C. Hoy, L. Nathan Oaklander, 1991 This book should be of interest to introductory philosophy philosophy of mind and metaphysics courses *Metaphysics* Michael J. Loux, 2001 This comprehensive anthology of classic and contemporary readings by leading philosophers complements the second edition of Michael Loux's *Metaphysics A Contemporary Introduction* Routledge 2001 *Metaphysics and Epistemology* Stephen Hetherington, 2013-06-25 *Metaphysics and Epistemology A Guided Anthology* presents a comprehensive introductory overview of key themes thinkers and texts in metaphysics and epistemology Presents a wide ranging collection of carefully excerpted readings on metaphysics and epistemology Blends classic and contemporary works to reveal the historical development and present directions in the fields of metaphysics and epistemology Provides succinct insightful commentary to introduce the essence of each selection at the beginning of chapters which also serve to inter link the selected writings [Classic and Contemporary Readings in Sociology](#) Ian Marsh, Rosie Campbell, Mike Keating, 2014-05-12 *Classic and Contemporary Readings in Sociology* introduces the reader to sociological issues theories and debates providing extracts of primary source material from both classical and contemporary theorists Theorists are examined within their historical and sociological framework and the text provides an analysis of developments in sociological thought and research The text is divided into four main sections Part One Origins and Concepts surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation in particular social control culture and socialisation Parts Two and Four Sociological Theories and Sociological Research include a number of readings from the founding theorists and investigators including Auguste Comte Emile Durkheim Karl Marx Max Weber and Charles Booth and also include more recent theoretical writing and research approaches The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities Part Three these readings provide students with examples of work from an area where sociological theorising and research has been widely applied **Knowledge and Reality** Steven M. Cahn, Maureen Eckert, Robert Buckley, 2004 A handy collection of readings regarding the philosophical areas of Epistemology and Metaphysics that includes both historical and contemporary works this book gives the reader a sense of how philosophical issues have evolved over time Forty eight selections from over 30 philosophers past and present deal with topics such as a priori knowledge skepticism foundationalism versus coherentism universals identity and change causation and the relationship between perception and the external world An accessibly slim volume of some the most interesting works from philosophers past and present this book should appeal to readers who are interested in the philosophical areas of metaphysics and epistemology **Philosophy of Mind: Contemporary Readings** Timothy O'Connor, 2005 *Philosophy of Mind Contemporary Readings* is a comprehensive anthology that draws together leading philosophers writing on the major topics within philosophy of mind Robb and O Connor have carefully chosen articles under the following headings Substance

Dualism and Idealism Materialism Mind and Representation Consciousness Each section is prefaced by an introductory essay by the editors which guides the student gently into the topic in which leading philosophers are included The book is highly accessible and user friendly and provides a broad ranging exploration of the subject Ideal for any philosophy student this book will prove essential reading for any philosophy of mind course The readings are designed to complement John Heil's *Philosophy of Mind A Contemporary Introduction* Second edition Routledge 2003 although the anthology can also be used as a stand alone volume

Commonsense Darwinism John Lemos, 2015-11-09 Written in a simple accessible style Commonsense Darwinism offers a clear critical examination of the subject Assuming that the diversity of life including human beings is the result of evolution from common origins and that its driving force is natural selection the book explores what this might mean for issues in ethics philosophy of religion epistemology and metaphysics The author's defense of free will makes this an especially stimulating read

Freedom, Teleology, and Evil Stewart Goetz, 2011-10-27 In *Freedom Teleology and Evil* Stewart Goetz defends the existence of libertarian freedom of the will He argues that choices are essentially uncaused events with teleological explanations in the form of reasons or purposes Because choices are uncaused events with teleological explanations whenever agents choose they are free to choose otherwise Given this freedom to choose otherwise agents are morally responsible for how they choose Thus Goetz advocates and defends the principle of alternative possibilities which states that agents are morally responsible for a choice only if they are free to choose otherwise Finally given that agents have libertarian freedom Goetz contends that this freedom is integral to the construction of a theodicy which explains why God allows evil

Classic and Contemporary Readings in the Philosophy of Education Steven M. Cahn, 1997 Brings together classic writings on education by leading figures in the history of philosophy along with notable contributions to the field by a variety of contemporary thinkers

A Companion to the Philosophy of Time Adrian Bardon, Heather Dyke, 2015-11-02 *A Companion to the Philosophy of Time* presents the broadest treatment of this subject yet 32 specially commissioned articles written by an international line up of experts provide an unparalleled reference work for students and specialists alike in this exciting field The most comprehensive reference work on the philosophy of time currently available The first collection to tackle the historical development of the philosophy of time in addition to covering contemporary work Provides a tripartite approach in its organization covering history of the philosophy of time time as a feature of the physical world and time as a feature of experience Includes contributions from both distinguished well established scholars and rising stars in the field
