Baer, 2001 Examining medical pluralism in the United States from the Revolutionary War period through the end of the twentieth century Hans Baer brings together in one convenient reference a vast array of information on healing systems as diverse as Christian Science osteopathy acupuncture Santeria southern Appalachian herbalism evangelical faith healing and Navajo healing In a country where the dominant paradigm of biomedicine medical schools research hospitals clinics staffed by M D s and R N s has been long established and supported by laws and regulations the continuing appeal of other medical systems and subsystems bears careful consideration Distinctions of class Baer emphasizes as well as differences in race ethnicity and gender are fundamental to the diversity of beliefs techniques and social organizations represented in the phenomenon of medical pluralism Baer traces the simultaneous emergence in the nineteenth century of formalized biomedicine and of homeopathy botanic medicine hydropathy Christian Science osteopathy and chiropractic He examines present day osteopathic medicine as a system parallel to biomedicine with an emphasis on primary care chiropractic naturopathy and acupuncture as professionalized heterodox medical systems homeopathy herbalism bodywork and lay midwifery in the context of the holistic health movement Anglo American religious healing and folk medical systems particularly among racial and ethnic minorities In closing he focuses on the persistence of folk medical systems among working class Americans and considers the growing interest of biomedical physicians pharmaceutical and healthcare corporations and government in the holistic health movement New Age and Neopagan Religions in America Sarah M. Pike, 2004 Sarah Pike traces the history of New Age and Neopagan religions in the United States from their origins in the nineteenth century to their reemergence in the 1960s counterculture She also considers the differences and similarities between the New Age and Neopagan movements as well as the antagonistic relationship between these two practices and other religions in America particularly Christianity Covering such topics as healing gender and sexuality millennialism and ritual experience she offers a sympathetic yet critical treatment of religious practices often marginalized yet soaring in popularity Her book is a rich analysis of these spiritual worlds and social networks and questions why these faiths are flourishing at this point in American history **A Handbook to Appalachia** Grace Toney Edwards, JoAnn Aust Asbury, Ricky L. Cox, 2006 A Handbook to Appalachia provides a clear concise first step toward understanding the expanding field of Appalachian studies from the history of the area to its sometimes conflicted image from its music and folklore to its outstanding literature Also includes information on African Americans Asheville North Carolina ballads baskets bluegrass music blues music Cherokee Indians Cincinnati Ohio Churches Civil War coal cultural diversity death folk culture food

Hanegraaff, 2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement

Selected Readings in the Anthropology of Religion Stephen D. Glazier, Charles A. Flowerday, 2003-12-30 Brings together in one volume a number of key theoretical and methodological advances in the anthropological study of religion Chapters cover important topics not ordinarily included in books dealing with the anthropology of religion e g bipedalism the study of alcohol film and video images notions of religious agency In addition this collection is intended to build bridges between anthropologists of religion and religious studies scholars Over the last four decades anthropologists have grappled with the dialectical relationship between the examination of cultures from the emic or insider perspective and the etic or outsider perspective Nowhere is this creative tension more evident than in the anthropological study of religion In this volume anthropologists and religious studies scholars come to terms not only with a landscape that has shifted fundamentally but a landscape that is still shifting Essays in this collection raise new and important issues for the anthropological study of religion in new and important ways In intensely personal essays a number of contributors address two fundamental concerns in the study of religion 1 how should anthropologists deal with the beliefs and practices of others and 2 how should anthropologists deal with their own religious backgrounds and beliefs as these may affect their understanding of the beliefs and practices of others A partial resolution to both questions is necessary before the anthropological study of religion can advance to a higher level

The Black Spiritual Movement Hans A. Baer, 2001 Spiritual churches in the United States represent one of several religious movements that African Americans have adopted in their efforts to cope with mainstream society In this groundbreaking work first published in 1984 Hans A Baer explores the richness and creativity of Black Spiritualism setting forth an illuminating ethnography of the movement that corrects numerous stereotypes of African American religion Baer shows that the Spiritual churches blend diverse elements borrowing aspects of African American Protestantism American Spiritualism Roman Catholicism Voodoo and black ethno medicine occasionally even including

aspects of Islam Judaism New Thought and Ethiopianism He describes not only the history structure ideology and practices of the churches but also the process of syncretism within them and their role within the African American community In addition Baer examines how the Spiritual movement juxtaposes elements of protest and accommodation to racism and class stratification in U S society This second edition includes a new preface and a new epilogue in which Baer discusses his methodology in researching the Black Spiritual Movement describes his meetings with pastors and congregation members and summarizes his most recent research in the field
