Methodologies Of Positivism And Marxism A Sociological Debate:

The Methodologies of Positivism and Marxism Norma R.A. Romm, 1991-06-18 Focusing on the methodological principles which underlie sociologists study of social reality this text offers clarification and outlines how the different approaches to study originate from various methodological and philosophical traditions

Critical Theory and Methodology Raymond A. Morrow, David D. Brown, 1994-06-24 Critical Theory traces its roots from Marxism through the renowned Frankfurt School to a wide array of national and cultural traditions Raymond Morrow's book traces the history and outlines the major tenets of critical theory for an undergraduate audience He exemplifies the theory through an analysis of two leading social theorists Jürgen Habermas and Anthony Giddens Unique to this volume is the emphasis on the link between Critical Theory and empirical research and social science methodology often thought to be incompatible

Conceptions of Social Inquiry J. J. Snyman, 1993

Mixed Methods and Cross Disciplinary Research Janet McIntyre-Mills, Norma R. A. Romm, 2019-07-12 This book uses mixed methods to extend the concept of wellbeing stocks to refer to dynamic ways of working with others It addresses metaphors and praxis for weaving together strands of experience The aim of the wellbeing stocks concept is to enable people to re evaluate economics and to become more aware of the way in which we neglect social and environmental aspects of life The pursuit of profit at the expense of people and the environment is a central problem for democracy and governance The vulnerability of cities is a symptom of the lack of balance between individual and collective needs This book explores the potential for cities specifically in the regions of Indonesia Africa and Australia to become more productive as sites for food and water security through more creative use of technology It highlights the need for partners that see food and security feasible at the household level if supports are provided at the community national and international level The book examines how these regions are affected by demographics climate change and people movements but also explores ways to establish an effective cultural ecosystem management

Accountability in Social Research Norma Romm, 2007-05-08 In this book I have concentrated on drawing attention to various conceptions of accountability that might be brought to bear in judging the practice of social research Much of the book is organized around making explicit the assumptions that influence what counts as proper research in society including assumptions about how social inquirers might be held accountable My focus is on reviewing discourses around the practice of professional inquiry with a view to reconsidering the way in which people create expectations for accountable social inquiry My focus hereon is related to my concern that the manner in which judgments about researchers accountability are made is not without social consequences for our way of living in society I have approached the issues by beginning with a discussion of tenets of the position called positivism so named by certain proponents and by considering the view on accountability that is implied by adherence to these tenets Briefly expressed positivist argumentation suggests that researchers are required to do science in a manner that warrants their being considered indeed scientists I use my discussion of accountability as seen within positivist

argumentation to explicate ways in which alternative positions have arisen as ways of treating accountability issues Through my way of comparing the various positions I hope to provide some indication of the complexity of ethical and accountability issues in social inquiry

Critical Systems Thinking Robert L. Flood, Norma R.A. Romm, 2007-08-28 This volume offers comprehensive treatment of the latest developments in critical systems thinking and practice The book features contributions by researchers at the prestigious Centre for Systems Studies at the University of Hull England The emphasis is on rigorous analysis of the wide range of approaches to problem solving reported in the research literature This work will enhance the studies of researchers and students in the areas of systems problem solving action research management science and operational research

Social Science Gerard Delanty, 1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge

Social Science Delanty, Gerard, 2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory

A Modern Guide to Austrian Economics Bylund, Per L., 2022-10-11 This Modern Guide explores central ideas concepts and themes in the Austrian school of economics with a focus on how they and with them the overall theory have evolved over recent decades Leading scholars offer their insights into potential directions of future research in the field pointing towards contemporary debates and their potential conclusions underdeveloped aspects and extensions of theory and current applications of interest

Philosophical Issues In Information Systems R L Winder, S K Probert, I. A. Beeson, 2024-11-01 This ground breaking book represents the work of a variety of researchers in information systems that share a common concern to use philosophical

approaches to help solve problems in information systems It brings together many of the leading researchers in the field and provides a broad based range of chapters addressing key contemporary issues in the field It looks at philosophical and social implications of the development of IS relates these issues to the role IS plays in contemporary business and cultural theory and discussed IS in a social and philosophical context rather than simply as technology
