The Chakra System with the Minor Chakras Harry Eilenstein, 2022-11-03 Best known are the seven main chakras Root Chakra Hara Solar Plexus Heart Chakra Throat Chakra Third Eye and Crown Chakra But they are not the only chakras there are also for example the minor chakras in the arms and the legs Of particular interest are also the intermediate chakras between the main chakras which limit their lands like borders with gates that can pump the life force from one chakra to another and play an important role in the formation and resolution of trauma The chakras are the organs of the life force body Just as the physical body has

a blood circulation the life force body also has a life force circulation the Kundalini which flows in the three central veins of the Sushumna and Ida and Pingala Furthermore there is a special form of secondary chakras that transform the images in the chakras into docking points for the outside world the kshetrams and the aura points They correspond to the sense organs and the hands of the physical body In order to be able to grasp this complex system which is nevertheless constructed in a very simple and coherent way in all its details and in its great elegance this book compares the knowledge of the chakras of different peoples the acupuncture points of Chinese Medicine the Marma points from Indian Ayurveda and the Rang Dr l points from Tibetan Medicine The result of these considerations is the description of the meaningful attitude in life after all the chakras are also the organs of the psyche and their healthy state therefore is also the healthy attitude of a person
