Colors in Fashion Jonathan Faiers, Mary Westerman Bulgarella, 2016-11-17 Color speaks a powerful cultural language conveying political sexual and economic messages that throughout history have revealed how we relate to ourselves and our world This ground breaking compilation is the first to investigate how color in fashionable and ceremonial dress has played a significant social role indicating acceptance and exclusion convention and subversion From the use of white in pioneering feminism to the penchant for black in post war France and from mystical scarlet broadcloth to the horrors of arsenic laden green fashion this publication demonstrates that color in dress is as mutable nuanced and varied as color itself Divided into

four thematic parts solidarity power innovation and desire each section highlights the often violent emotional histories of color in dress across geographical temporal and cultural boundaries Underlying today's relaxed attitude to color lies a chromatic complexity that speaks of wars migrations and economics While acknowledging the importance that technology has played in the development of new dyes the chapters explore color as a catalyst for technical innovation that continues to inspire designers artists and performers Bringing together cutting edge contributions from leading scholars it is essential reading for academics of fashion textiles design cultural studies and art history Sun of Many Colors Jacob
