The Life of General Washington, Comander in Chief of the American Forces John Marshall, 1840 **The Life of George Washington, Commander in Chief of the American Forces, During the War which Established the Independance of His Country** John Marshall, 1832 *The Authorised History of British Defence Economic Intelligence* Peter Davies, 2018-06-27 This book is the first history of UK economic intelligence and offers a new perspective on the evolution of Britain s national intelligence machinery and how it worked during the Cold War British economic intelligence has a longer pedigree than the Joint Intelligence Committee JIC and was the vanguard of intelligence coordination in Whitehall yet it remains a missing field in intelligence studies This book is the first history of this core government capability and shows how central it was to the post war evolution of Whitehall s national intelligence machinery It places special emphasis on the Joint Intelligence Bureau and Defence Intelligence Staff two vital organisations in the Ministry of Defence underpinning the whole Whitehall intelligence edifice but almost totally ignored by historians Intelligence in Whitehall was not conducted in a parallel universe This contrasts with the conventional wisdom which accepts the uniqueness of intelligence as a government activity and is symbolised by the historical profile of the JIC The study draws on the official archives to show that the mantra of the existence of a semi autonomous UK intelligence community cannot be sustained

against the historical evidence of government departments using the machinery of government to advance their traditional priorities Rivalries within and between agencies and departments and their determination to resist any central encroachment on their authority emasculated a truly professional multi skilled capability in Whitehall at the very moment when it was needed to address emerging global economic issues This book will be of much interest to students of British government and politics intelligence studies defence studies security studies and international relations in general The Life of General Washington, Commander in Chief of the American Forces John Marshall,1846 *The Principles of the Law of Restitution* Graham Virgo,2015-08-13 The third edition of The Principles of the Law of Restitution brings this widely cited and influential volume fully up to date It has been substantially rewritten to reflect the significant changes in the law of restitution and the expansion in the theoretical and critical commentary on the subject Following important decisions of the Supreme Court and other courts large scale changes have been made to the chapters on enrichment at the expense of the claimant mistake claims against public authorities and change of position Additionally this edition contains a new chapter on the operation of juridical bars on restitutionary claims References to developments in other jurisdictions have been expanded for this edition reflecting the significance of these changes and how they assist in the interpretation of English law and provide a basis for criticising that law Further in the light of leading cases and the contributions of restitutionary scholars around the world the author's views on specific controversial debates about the ambit function and interpretation of the subject have changed sometimes radically One significant aspect of the book remains unchanged the book continues to focus on the identification and analysis of the principles which underpin the law of restitution as a whole but with reference to its three distinct parts unjust enrichment restitution for wrongs and the vindication of property rights This approach provides the reader with a peerless guide to the law of restitution *Ireland Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments* IBP USA,2013-08 2011 Updated Reprint Updated Annually Ireland Army National Security and Defense Policy Handbook **The Military Balance 2025** The International Institute for Strategic Studies (IISS),2025-02-12 The Military Balance has been published since 1959 The 2025 edition provides an open source assessment of the armed forces and equipment inventories of over 170 countries with accompanying defence economics data In addition to detailed country data The Military Balance includes graphics to illustrate defence personnel equipment and procurement developments It assesses important defence issues by region including Russia's continuing invasion of Ukraine the diverse range of ballistic and cruise missiles used by the Houthis and developments in defence industrial production The accompanying wallchart focuses on China's armed forces detailing selected unit locations and assessing the status of important aspects of PLA modernisation The book draws on the breadth of data in the Military Balance online database The Military Balance and Military Balance are indispensable sources of information for those involved in defence and security policymaking analysis and research **Defense, Technical Cooperation** ,2000 **Military Operations of the Dutch**

Army, 10th-17th May 1940 P. L. G. Doorman, 2005 Most studies of the 1940 Western Campaign have tended to focus on a narrow range of topics principally those relating the German forces or the epic of Dunkirk The publication of this title is aimed at redressing the balance by providing a detailed account of the operations of the Dutch army during this campaign The author begins by presenting a detailed account of the Dutch army prior to the campaign including its plan of campaign He also includes a fascinating chapter discussing the geography of the Netherlands from a military point of view The remainder of the text consists of a daily account of the Dutch army's operations down to regimental or independent battalion level In doing so the author clearly demonstrates the combat capability of the Dutch troops and the brave and tenacious defense with which they met the German invasion Appendices provide a detailed order of battle and sample orders This is a significant contribution to the literature available on the 1940 campaign in France and the Low Countries The Military Balance 2022 The International Institute for Strategic Studies (IISS), 2022-02-14 Published each year since 1959 The Military Balance is an indispensable reference to the capabilities of armed forces across the globe It is used by academia the media armed forces the private sector and government It is an open source assessment of the military forces and equipment inventories of 171 countries with accompanying defence economics and procurement data Alongside detailed country data The Military Balance assesses important defence issues by region as well as key global trends such as in defence technology and equipment modernisation This analysis is accompanied by full colour graphics including maps and illustrations With extensive explanatory notes and reference information The Military Balance is as straightforward to use as it is extensive The 2022 edition is accompanied by a full colour wall chart illustrating security dynamics in the Arctic The Military Balance 2024 The International Institute for Strategic Studies (IISS), 2024-02-13 The Military Balance has been published since 1959 The 2024 edition provides an open source assessment of the armed forces and equipment inventories of over 170 countries with accompanying defence economics data In addition to detailed country data The Military Balance assesses region by region important military issues It includes graphics to illustrate defence personnel equipment and procurement developments The 65th edition examines emerging lessons from Russia's full scale invasion of Ukraine details Chinese military activity around Taiwan and identifies developments in uninhabited aerial vehicle exports The accompanying wallchart spotlights the important issues around critical national infrastructure in the Euro Atlantic The book draws on the breadth of data in the Military Balance online database The Military Balance and Military Balance are indispensable sources of information for those involved in defence and security policymaking analysis and research **Transition to Guardianship: The Indian Navy 1991-2000** Vice Admiral GM Hiranandani, **The Economics of Defense Industry** Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly

skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis Year Book Australia, 1985 Australian Bureau of Statistics,1984
