Party Systems in East Central Europe Ladislav Cabada, Vít Hloušek, Petr Jurek, 2014-01-23 Party Systems in East Central Europe analyzes the formation of political parties in the nations of this region In the first part the authors concentrate on the key periods and turning points in this development connecting them with the democratization of the countries in the region in the last third of the nineteenth century This includes a look at the period before World War I between the wars and particularly in the times after the fall of the communist regimes The analysis focuses chiefly on the ideological background that gave way to the rise of political parties in the region In relation to this the authors base their writing mainly on the socio political theory of Stein Rokkan The second part of the book is a political analysis of the key aspects related to party politics First the authors examine the ties of political parties to broad social processes using the classic theories of Giovanni Sartori and Stein Rokkan Next they continue with the analysis of the operation of parties within governments with a special focus on the creation of coalition governments functioning of coalitions and coalition governance Last some defects are reflected upon as well as unfinished processes related to the fast establishment of political parties in the region e g absence of firm links with social groups high volatility instability of parties etc

Europe's Radical Left Luke March, Daniel Keith, 2016-10-20 Although the most pernicious consequences of the crisis have apparently abated the long term political repercussions remain unclear Whereas most attention has focused on the right wing populist parties the rejuvenation of the left is an unwritten story of post crisis politics This volume addresses this story with three principal aims to examine the radical left intellectual response to the crisis i e how actors conceptualise the causes of crisis and its consequences to examine the radical left electoral response to the crisis i e how the crisis has aided or weakened the

electoral success of radical left parties and movements to examine organisational responses i.e. whether the crisis has resulted in new party structures methods of organising and internal party tendencies The result is a comprehensive compendium drawing on cutting edge research from leading European experts to present the first comparative analysis of how the far left of the political spectrum has responded to the crisis It furthers our understanding both of the dynamics of European party systems and the wider consequences of the Great Recession

National Narcissism Eric Beckett Weaver, 2006 National Narcissism offers a groundbreaking anthropological and sociological approach to nationalism through an exposé of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion This theoretical approach is illustrated with examples primarily taken from Hungary with a special focus in two chapters on the role of gender in nationalism The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support The theory offered by National Narcissism has wide ranging implications for the future study of extremist nationalism in nation states throughout the world Sociologists anthropologists nationalism studies specialists social psychologists and historians of the recent past in Hungary will find that this theoretical book richly illustrated with examples from Hungarian society challenges positive and negative stereotypes about nationalism extremism post communism central and eastern Europe the European Union and not least about Hungarians themselves

Historical Legacies of Communism in Russia and Eastern Europe Mark Beissinger, Stephen Kotkin, 2014-07-07 This book takes stock of arguments about the historical legacies of communism that have become common within the study of Russia and East Europe more than two decades after communism's demise and elaborates an empirical approach to the study of historical legacies revolving around relationships and mechanisms rather than correlation and outward similarities Eleven essays by a distinguished group of scholars assess whether post communist developments in specific areas continue to be shaped by the experience of communism or alternatively by fundamental divergences produced before or after communism Chapters deal with the variable impact of the communist experience on post communist societies in such areas as regime trajectories and democratic political values patterns of regional and sectoral economic development property ownership within the energy sector the functioning of the executive branch of government the police and courts the relationship of religion to the state government language policies and informal relationships and practices

Transitions Juan A. Roche Cárcel, 2016-06-30 The monograph essentially seeks to compare the sociopolitical construction processes of Spain Latin America Eastern Europe and North Africa And even though the papers included in it deal above all with the differences between the different democratic developments mentioned above the central idea transmitted is that they have been marked by complexity instability and risk in short by fragility In this respect the issue offers a twofold look as it tries to analyze the

transition processes towards democracy and at the same time the current state of democracy its fragility or its lack of quality both approaches being merged into one

Historical Memory of Central and East European Communism Agnieszka Mroziak, Stanislav Holubec, 2018-03-19 Every political movement creates its own historical memory The communist movement though originally oriented towards the future was no exception The theory of human history constitutes a substantial part of Karl Marx's and Friedrich Engels's writings and the movement inspired by them very soon developed its own strong historical identity combining the Marxist theory of history with the movement's victorious milestones such as the October Revolution and later the Great Patriotic War which served as communist legitimization myths throughout almost the entire twentieth century During the Stalinist period however the movement's history became strongly reinterpreted to suit Joseph Stalin's political goals After 1956 this reinterpretation lost most of its legitimating power and instead began to be a burden The unwanted memory of Stalinism and subsequent examples of violence the Gulag Katy the 1956 Budapest uprising and the 1968 Prague Spring contributed to the crisis of Eastern European state socialism in the late 1980s and led to attempts at reformulating or even rejecting communist self identity This book's first section analyzes the post 1989 memory of communism and state socialism and the self identity of the Eastern and Western European left The second section examines the state socialist and post socialist memorial landscapes in the former German Democratic Republic Czechoslovakia Czech Republic Poland Lithuania Ukraine and Russia The final section concentrates on the narratives the movement established when in power about its own past with the examples of the Soviet Union Poland Romania and Czechoslovakia

Preying on the State Venelin I. Ganev, 2013-07-02 Immediately after 1989 newly emerging polities in Eastern Europe had to contend with an overbearing and dominant legacy the Soviet model of the state At that time the strength of the state looked like a massive obstacle to change less than a decade later the state's dominant characteristic was no longer its overweening powerfulness but rather its utter decrepitude Consequently the role of the central state in managing economies providing social services and maintaining infrastructure came into question Focusing on his native Bulgaria Venelin I Ganev explores in fine grained detail the weakening of the central state in post Soviet Eastern Europe Ganev starts with the structural characteristics of the Soviet satellites and in particular the forms of elite agency favored in the socialist party state As state socialism collapsed Ganev demonstrates its institutional legacy presented functionaries who had become accustomed to power with a matrix of opportunities and constraints In order to maximize their advantage under such conditions these elites did not need a robust state apparatus in fact all of the incentives under postsocialism pushed them to subvert the infrastructure of governance Throughout *Preying on the State* Ganev argues that the causes of state malfunctioning go much deeper than the policy preferences of free marketeers who deliberately dismantled the state He systematically analyzes the multiple dimensions implications and significance of the institutional and social processes that transformed the organizational basis of effective governance
