The Redesigned Forest Chris Maser, 1990 Baldy Fire Recovery Project, Klamath National Forest, Final Environmental Impact Statement United States. Forest Service. Pacific Southwest Region, 1990 **Klamath National Forest (N.F.), Baldy Fire Recovery Project**, 1990 Last Wild Edge Susan Zwinger, 1999-06 The northwestern edge of North America is a final edge to settle on a finite planet Where does mankind go from here Where else have we not settled altered and consumed Author Susan Zwinger suspects that we have saved this wild edge for last because its geography is punched exploded ground and drenched Its forest of enormous trees once created a boundary difficult to penetrate let alone farm Yet today this wildness is under threat as civilization bores its way into even this remote edge **Wild Hunger** Bruce Wilshire, 1999-10-27 Why is it that even amidst affluence and power our culture is plagued by a variety of addictions In this pioneering work Bruce Wilshire searches for answers by giving serious attention to our genetic legacy from our hunter gatherer ancestors as well as to the unique ways we adapt to our environment through the practice of science and the creation of art and cities The work considers remedies for specific addictions including drugs alcohol cigarettes and gambling suggesting that wilderness exploration in the arts myths and ceremonies can help us rediscover what it means to be human creatures Bringing together the insights of philosophy religion cultural anthropology behavioral biology and the vast socio medical literature on addiction Wilshire ingeniously explores the limits of our adaptive capacity and the costs of depleting the natural regenerative functions of the body **Kootenai National Forest (N.F.), Miller West Fisher Project**, 2009 *Readings in the Philosophy of Technology* David M. Kaplan, 2009-10-16 Ideal for professors who want to provide a comprehensive set of the most important readings in the philosophy of technology from foundational to the cutting edge this book introduces students to the various ways in which societies technologies and environments shape one another The readings examine the nature of technology as well as the effects of technologies upon human knowledge activities societies and environments Students will learn to appreciate the ways that philosophy informs our understanding of technology and to see how technology relates to ethics politics nature human nature computers science food and animals **Thinking like a Mall** Steven Vogel, 2016-09-02 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature as Bill McKibben and other environmental thinkers have declared what is there left to protect In Thinking like a Mall Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its

ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be. The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking. The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it.

Mississippi Forests and Forestry James E. Fickle, 2001. From prehistory to the present people have harvested Mississippi's trees, cultivated and altered the woodlands and hunted forest wildlife. Native Americans, the first foresters, periodically burned the undergrowth to improve hunting and to clear land for farming. Mississippi Forests and Forestry tells the story of human interaction with Mississippi's woodlands. With forty black and white images and extensive documentation, this history debunks long held myths such as the notion of the first settlers encountering virgin forests. Drawing on primary materials, government documents, newspapers, interviews, contemporary accounts, and secondary works, historian James E. Fickle describes an ongoing commerce between people and place from Native American maintenance of the woods to white exploration and settlement to early economic activities in Mississippi's forests to present day conservation and responsible use. Viewed over time, issues of conservation are rarely one-sided. Mississippi Forests and Forestry describes how the rise of scientific forestry coincided with the efforts of some early lumber companies and industrial foresters to operate responsibly in harvesting trees and providing for reforestation. Surprisingly, the rise of the pulp and paper industry made reforestation possible in many parts of the state. Mississippi Forests and Forestry is a history of individuals as well as industries. The book looks closely at the ways the lumber industry operated in the woods and mills and at the living and working conditions of people in the industries. It argues that the early industrial foresters, some lumber companies, and pulp and paper manufacturers practiced utilitarian conservation. By the late 1950s they accomplished what some considered a miracle: Mississippi's forests had been restored. With the rise of environmentalism in the 1960s, popular ideas concerning the proper management and use of forests changed. Practices such as clear-cutting, single-age management, and manufacturing by chip mills became highly controversial. Looking ahead, Mississippi Forests and Forestry examines the issues that remain heated topics of conservation and use.

Forest Dreams, Forest Nightmares Nancy Langston, 2009-11-23. Across the inland West, forests that once seemed like paradise have turned into an ecological nightmare. Fires, insect epidemics, and disease now threaten millions of acres of once bountiful forests. Yet no one can agree what went wrong. Was it too much management or not enough that forced the forests of the inland West to the verge of collapse? Is the solution more logging or no logging at all? In this gripping work of scientific and historical detection, Nancy Langston unravels the disturbing history of what went wrong with the western forests despite the best intentions of those involved. Focusing on the Blue Mountains of northeastern Oregon and southeastern Washington, she explores how the complex landscapes that so impressed settlers in the nineteenth century became an ecological disaster in

the late twentieth Federal foresters intent on using their scientific training to stop exploitation and waste suppressed light fires in the ponderosa pinelands Hoping to save the forests they could not foresee that their policies would instead destroy what they loved When light fires were kept out a series of ecological changes began Firs grew thickly in forests once dominated by ponderosa pines and when droughts hit those firs succumbed to insects diseases and eventually catastrophic fires Nancy Langston combines remarkable skills as both scientist and writer of history to tell this story Her ability to understand and bring to life the complex biological processes of the forest is matched by her grasp of the human forces at work from Indians white settlers missionaries fur trappers cattle ranchers sheep herders and railroad builders to timber industry and federal forestry managers The book will be of interest to a wide audience of environmentalists historians ecologists foresters ranchers and loggers and all people who want to understand the changing lands of the West
