Designing Human Systems Steve Hickey, Holly Matthies, Enid Mumford, 2006-06-03 Enid Mumford 1924 2006 was a pioneer in the sociotechnical design of computer systems Prof Mumford's work successfully investigated the introduction and implementation of computer systems by large corporations and governments Mumford's ETHICS approach to software development emphasizes user participation thus avoiding many of the problems of introducing new systems It takes a holistic view of organizations unifying both social and technological solutions This updated edition of Mumford's book Designing Human Systems describes how modern agile programming techniques complement the ETHICS method Together the two methods cover both user and developer issues This integrated approach offers an improved methodology for successful software development projects

Critical Systems Thinking and the Management of Complexity Michael C. Jackson, 2019-04-08 From the winner of the INCOSE Pioneer Award 2022 The world has become increasingly networked and unpredictable Decision makers at all levels are required to manage the consequences of complexity every day They must deal with problems that arise unexpectedly generate uncertainty are characterised by interconnectivity and spread across traditional boundaries Simple solutions to complex problems are usually inadequate and risk exacerbating the original issues Leaders of international bodies such as the UN OECD UNESCO and WHO and of major business public sector charitable and professional organizations have all declared that systems thinking is an essential leadership skill for managing the complexity of the economic social and environmental issues that confront decision makers Systems thinking must be implemented more generally and on a wider scale to address these issues An evaluation of different systems methodologies suggests that they concentrate on different aspects of complexity To be in the best position to deal with complexity decision makers must understand the strengths and weaknesses of the various approaches and learn how to employ them in combination This is called critical systems thinking Making use of over 25 case studies the book offers an account of the development of systems thinking and of major efforts to apply the approach in real world interventions Further it encourages the widespread use of critical systems practice as a means of ensuring responsible leadership in a complex world The INCOSE Pioneer Award is presented to someone who by their achievements in the engineering of systems has contributed uniquely to major products or outcomes enhancing society or meeting its needs The criteria may apply to a single outstanding outcome or a lifetime of significant achievements in
