Redistribution Reactions:

Redistribution Reactions J.C. Lockhart, 2012-12-02 Redistribution Reactions is a comprehensive coverage of redistribution phenomena for the entire Periodic Table This book is organized into two sections encompassing 10 chapters that tackle the concepts of structural reorganization Part I provides first an overview of redistribution reactions followed by a discussion on a series of techniques capable of detecting all compounds in a redistribution reaction including electronic vibrational and nuclear magnetic spectroscopy X ray crystallography mass spectroscopy polarography chromatography and the use of phase diagram Part II is devoted to the redistribution reactions of the elements under Periodic Group headings with available kinetics or thermodynamics information This part also presents valuable structural information of the group elements such as their vibrational frequencies and chemical shifts This work will be of convenient reference for researchers already working on redistribution and for a more general range of research workers in inorganic chemistry who require information on scrambling for a specific element *Organometallic Reactions* Ernest I. Metal- and Metalloid-Containing Macromolecules Alaa S. Abd-El-Aziz,2003-10-03 The past two decades have seen tremendous developments in the field of metal and metalloid containing macromolecules The design of new monomers containing metal and metalloid elements and their subsequent polymerization has resulted in a vast array of inorganic and organometallic polymers with interesting properties and applications This volume features 30 articles based on presentations given in the Metal and Metalloid Containing Macromolecules Symposium at the 39th IUPAC Congress and 86th Conference of the Canadian Society for Chemistry in Ottawa from August 10 15 2003 The articles written by some of the leading researchers in the field describe the synthesis properties and applications of inorganic and organometallic polymers and the current focuses of research in these fields The purpose of this symposium was to generate dialogue between these researchers and to allow them to present some of their most recent findings **Inorganic Reactions and Methods, The**
