Reduced Instruction Set Computer--RISC--architecture Daniel Tabak,1987 *Algorithms, Smart Chips and Their Applications* Ferenc Vajda,1989 RISC Systems Daniel Tabak,1990-08-10 Reduced Instruction Set Computer RISC technology is advancing at a rapid pace even since publication of the author s RISC Architecture in 1987 This work fills the need for a text that presents the state of the art in RISC technology highlighting the latest and most important design methodologies that RISC technology has made possible Serving advanced students as well as practicing engineers and computer scientists Presents the basic principles and properties of RISC discusses its advantages and disadvantages and describes RISC applications A number of leading commercial and experimental RISC systems which are themselves compared and evaluated are also covered Several chapters are devoted to a specific manufacturer and its system and the results of numerous comparative experimental runs of standard benchmark problems are presented along with evaluative discussions Numerous problems basic definitions and a glossary of abbreviations are also included RISC Systems and Applications Daniel Tabak,1996 **Implementation of Functional Multiprocessors** Olivier Boudillet,Jai Prakash Gupta,Stephen Winter,1991 Describes one example of implementing parallel processing computer technology using multi CPU systems based on commercially available devices Explains the methodology of implementing a distributed operating system based on the lambda calculus details the CTDOS system to handle the reduction mechanism and demonstrates an implementation on a network of transputers For graduate students and researchers in computer science Annotation copyrighted by Book News Inc Portland OR **Communications Technology Handbook** Geoff Lewis,2013-04-03 This is the first point of reference for the communications industries It offers an introduction to a wide range of topics and concepts encountered in the field of communications technology Whether you are looking for a simple explanation or need to go into a subject in more depth the Communications Technology Handbook provides all the information you need in one single volume This second edition has been updated to include the latest technology including Video on Demand Wire less Distribution systems High speed data transmission over telephone lines Smart cards and batteries Global positioning Systems The contents are ordered initially by communications systems This is followed by an introduction to each topic and goes on to provide more detailed information in alphabetical order Every section contains an explanation of common terminology and further references are provided This approach offers flexible access to information for a variety of readers Those who know little about communications professionals the book constitutes a handy reference source and a way of finding out about related technologies The book addresses an international audience by referring to all systems and standards throughout This book has been revised to include new sections on Video on demand Wire less distribution systems High speed data transmission over telephone lines Smart cards Global positioning systems provides a basic understanding of a wide range of topics offers a flexible approach for beginners and specialists alike addresses an international audience by referring to all

systems and standards throughout *Proceeding of the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017)* Vijay Nath,Jyotsna Kumar Mandal,2018-07-30 The volume presents high quality papers presented at the Second International Conference on Microelectronics Computing Communication Systems MCCS 2017 The book discusses recent trends in technology and advancement in MEMS and nanoelectronics wireless communications optical communication instrumentation signal processing image processing bioengineering green energy hybrid vehicles environmental science weather forecasting cloud computing renewable energy RFID CMOS sensors actuators transducers telemetry systems embedded systems and sensor network applications It includes original papers based on original theoretical practical experimental simulations development application measurement and testing The applications and solutions discussed in the book will serve as a good reference material for future works **Real-Time Expert Systems**

Computer Architecture R.F. Hodson,2018-01-17 Expert systems and real time systems technology have been developed independently Expert systems have been successfully implemented in many complex applications traditionally performed by human experts Real time systems have been successfully applied in areas requiring interaction with dynamic environments control and monitoring applications for example Merging these two technologies will yield intelligent systems capable of interacting with complex dynamic environments an area in which human operators exhibit poor productivity due to cognitive overload High Performance Computing and Communications Jack Dongarra,Laurence T. Yang,Omer F. Rana,Beniamino

Di Martino,2005-09-12 This book constitutes the refereed proceedings of the First International Conference on High Performance Computing and Communications HPCC 2005 held in Sorrento Italy in September 2005 The 76 revised full papers and 44 revised short papers presented were carefully reviewed and selected from 273 submissions The papers are organized in topical sections on network protocols routing and algorithms languages and compilers for HPC parallel and distributed system architectures embedded systems parallel and distributed algorithms wireless and mobile computing Web services and Internet computing peer to peer computing grid and cluster computing reliability fault tolerance and security performance evaluation and measurement tools and environments for software development distributed systems and applications high performance scientific and engineering computing database applications and data mining HPSRF pervasive computing and communications and LMS **Operating Systems for Supercomputers and High Performance**

Computing Balazs Gerofi,Yutaka Ishikawa,Rolf Riesen,Robert W. Wisniewski,2019-10-15 Few works are as timely and critical to the advancement of high performance computing than is this new up to date treatise on leading edge directions of operating systems It is a first hand product of many of the leaders in this rapidly evolving field and possibly the most comprehensive This new and important book masterfully presents the major alternative concepts driving the future of operating system design for high performance computing In particular it describes the major advances of monolithic operating systems such as Linux and Unix that dominate the TOP500 list It also presents the state of the art in lightweight

kernels that exhibit high efficiency and scalability at the loss of generality Finally this work looks forward to possibly the most promising strategy of a hybrid structure combining full service functionality with lightweight kernel operation With this it is likely that this new work will find its way on the shelves of almost everyone who is in any way engaged in the multi discipline of high performance computing From the foreword by Thomas Sterling
