Globalizing China - Social and Governance Reforms Ka Ho Mok, 2022-12-30 Unlike most books which consider China's transformation and globalization over the last four decades by focusing on China's economic growth this book examines how the Chinese regime has handled the increasingly complex sociopolitical and socio economic challenges generated as a result of the country's economic growth and transformation challenges arising both from within the country and also from the external political environment Based on extensive original research the book outlines how China's economic development has generated social and governance pressures discusses the government's social educational and governance reforms and highlights how China's development experiences which differ from the Western economies with democratic political regimes have drawn increasing attention from other countries in the developing world as an example to follow Mining Science and Technology Yuehan Wang, Shirong Ge, Guangli Guo, 2004-09-15 Jointly sponsored by the China University of Mining and Technology and the University of Nottingham UK a total of 187 papers have been included in the proceedings of which fifty two are contributed by authors outside of China Scholars and experts from both China and abroad discuss and exchange information on the latest developments in mining sc New Dual Economy: New Economic Prosperity And The Reengineering Of The Traditional Economy Chunsheng Zhou, Ziliang Wang, 2025-04-02 This book attempts to establish a new theoretical framework to analyze the intrinsic patterns of economic growth structural transformation and the shift of economic momentum in the digital economy era The book provides a detailed discussion on the interactions between the old and new economic sectors the limitless and limited sectors the migration of labor and capital between different sectors as

Re-balancing China Peter Nolan, 2015-03-01. *Re-balancing China* addresses three key sets of issues in China's political economy. Part One provides an analysis of the profound effect of the global financial crisis upon China's economy as well as the positive impact of the massive rescue package that was implemented in response to the crisis. Part Two focuses on the challenge of globalization for China's industrial policy. After more than two decades of industrial policy, China still has a negligible number of large firms that are competitive in global markets. China's experience presents a fundamental challenge to traditional concepts of industrial policy and development. Part Three examines China's international relations in particular its relationship with the US and the interactions between the two countries in the East and South China Seas.

Cities and Social Governance Reforms Ka Ho Mok, 2022-05-13. This book examines critically how the Chinese government has proactively engaged the nine cities and two special administrative regions in the Greater Bay Area (GBA) in Southern China for deeper collaborations in order to transform the country from the World Factory to become a leading world economy in innovation and entrepreneurialism. While most of the existing research related to China's GBA development offers the economic and technological advancement perspectives, this book focuses on critical reflections upon how the call for megacity development and deeper regional collaborations in the Bay Area will affect people's livelihoods, social integration, and urban governance. The central theme of this book builds around Cities, Social Cohesion, and Governance. Based upon policy and document analysis, first-hand fieldwork, and surveys and intensive interviews with major stakeholders responsible for pushing the Greater Bay Area development, this book offers not only regional perspectives in analyzing the Greater Bay Area development through comparing and contrasting development experiences within the country's different bay economies like the Shanghai and Zhejiang Bay Area and Beijing and Bohai Bay Area. The present book also draws
