and construct our perspectives and understanding of death and dying Of course the present volume does not attempt to be exhaustive and considers the subject from several standpoints including linguistics anthropology history of medicine and importantly literary studies It combines various points of view and different methodologies of knowledge in the hope that they come together to constitute a written dialogue or more precisely a polylogue The ordering of the texts in this volume provides readers with an itinerary that begins with more general approaches such as a historical presentation of the medicalisation of death and an in depth reflection on the best way to die and ends with studies of specific literary works from different periods The itinerary that this book provides is framed by a discourse analysis based overview that explores how different approaches to death and dying intersect and complement each other in an interdisciplinary endeavour This analysis focuses on literary and non literary genres in order to shed some new light on a topic that is inexhaustible because of its sociocultural relevance
