The Role of Reflection in Managerial Learning Marilyn W. Daudelin, Kent W. Seibert, 1999-09-30 Challenging work experiences are the richest source of learning for today s managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today s workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience

Critical Reflection Robert Malcolm Murray, Nebojsa Kujundzic, 2005 In an era of information overload our need to learn how to critically evaluate the growing flood of information has never been greater Critical Reflection showcases the role of reason in a world saturated by media enhanced persuasion and complex scientific and technological jargon Drawing from the classic philosophical texts this engaging textbook on the art of analyzing arguments is also relevant to today s undergraduates in its use of real life examples and exercises drawn mainly from media

and politics Malcolm Murray and Nebojsa Kujundzic cover the standard subjects in a one semester course on critical thinking offering ways to analyze arguments **Reflection in Learning and Professional Development** Jennifer A.

Moon,2013-09-05 Reflection is a technique for aiding and reinforcing learning used in education and professional development This volume offers practitioners and students guidance that cuts across theoretical approaches enabling them to understand and use reflection to enhance learning in practice
